TITLE SHEET	i
LEGISLATION LETTER	ii
APPROVAL SHEET	iii
DECLARATION OF AUTHENTICITY	iv
SHEET OF DEDICATION	v
ACKNOWLEDGEMENTS	vi
PREFACE	viii
TABLE OF CONTENTS	ix
LIST OF TABLES	xi
LIST OF FIGURES	xii
ABSTRACT	xiii
INTISARI	xiv
CHAPTER I	1
1.1 Background	1
1.2 Objectives	5
1.3 Advantages of The Study	5
1.4 Scope and Limitation of Study	5
CHAPTER II	7
2.1 Literature Study	7
2.1.1 Coffee types and processing	7
2.1.2 Occurrence of mycotoxin during coffee processing	9
2.1.3 Treatments against ochratoxigenic fungi and ochratoxin A contamination	13
2.1.4 Microflora in coffee processing	15
2.2 Hypothesis	20
CHAPTER III	21
3.1 Materials and Tools	21
3.1.1 Microorganisms	21
3.1.2 Media	22
3.2 Methods	23
3.2.1 Identification of yeast species	23
3.2.2 Pectinolytic activity assessment of yeast isolates	24
3.2.3 Confirmation of OTA-producing ability of fungi isolates	25

3.2.4	Co-cultivation study between yeast and ochratoxigenic fungi	26
3.2.5	Observation of antagonistic activity by yeast isolates on OTA production by ochratoxigenic fungi	28
3.3	Statistical Analysis	28
CHAPTER IV	29
4.1	Species Identification of Yeast Isolates from Fermented Coffee Beans	29
4.2	Pectinolytic Activity of Yeast Isolates from Fermented Coffee Beans	31
4.3	Confirmation of OTA-Producing Ability of Ochratoxigenic Fungi Isolates 35	
4.4	Antagonistic Activity by Yeast Isolates on Ochratoxigenic Fungi	38
4.4.1	Co-cultivation study between yeast and ochratoxigenic fungi	38
4.4.1.1	Observation of yeast isolates cultivated with ochratoxigenic fungi	39
4.4.1.2	Observation of ochratoxigenic fungi cultivated with yeast isolates	43
4.4.2	OTA production of ochratoxigenic fungi together cultivated with yeast isolates 50	
CHAPTER V	53
5.1	Conclusion	53
5.2	Future Study	53
REFERENCES	55
APPENDIX	59
1.	SPSS Result of Yeast Colony Diameter	59
2.	SPSS Result of Fungal Colony Diameter	62
3.	SPSS Result of Fungal Inhibition Ratio	65
4.	SPSS Result of OTA Production	68
5.	API Kit Procedure	69
6.	Documentation of API Kit Analysis	70
7.	ELISA Kit Procedure	72
8.	Documentation of ELISA Kit & OTA Analysis	73
9.	Documentation of Pectinolytic Test	75
10.	Documentation of Confirmation Test	76
11.	Documentation of Co-Cultivation	87

LIST OF TABLES

Table 1. Ochratoxigenic fungi isolated from different countries.....	11
Table 2. Summary of fungal inhibition rate by various yeast genera in coffee	19
Table 3. Composition of yeast and fungi inoculation medium.....	23
Table 4. Identification results of yeast isolates	29
Table 5 Pectinolytic activity assessment results of yeast isolates	31
Table 6. Result of OTA-producing ability confirmation test by fungi isolates.....	36
Table 7. Colony diameter of yeast isolates cultivated with and without ochratoxigenic fungi (control).....	41
Table 8. Colony diameter and fungal inhibition ratio results of ochratoxigenic fungi cultivated with and without yeast isolates (control).....	45
Table 9. Sporulation of ochratoxigenic fungi cultivated with and without yeast isolates (control) after 5 days of incubation	47
Table 10. Result of OTA production by fungi isolates cultivated with and without yeast isolates	50

LIST OF FIGURES

Figure 1. Main steps of coffee post-harvest with of dry (left) and wet method (right)	9
Figure 2. Layout of inoculation for co-cultivation study	26
Figure 3. Observation results of pectinolytic activity assessment of yeast isolates; includes WBY1 (left), WBY2 (center), and WBY3 (right)	31
Figure 4. Upper side of PJ1 control	47
Figure 5. Bottom side of PJ1 control	47
Figure 6. Upper side of WBY1 control	47
Figure 7. Bottom side of WBY1 control	47
Figure 8. Upper side of WBY1 with PJ1	47
Figure 9. Bottom side of WBY1 with PJ1	47
Figure 10. Upper side of WBY2 control	48
Figure 11. Bottom side of WBY2 control	48
Figure 12. Upper side of WBY2 with PJ1	48
Figure 13. Bottom side of WBY2 with PJ1	48
Figure 14. Upper side of WBY3 control	48
Figure 15. Bottom side of WBY3 control	48
Figure 16. Upper side of WBY3 with PJ1	48
Figure 17. Bottom side of WBY3 with PJ1	48
Graph 1. Comparison of fungal OTA-producing ability in YES agar and MEA medium	36
Graph 2. Growth pattern of WBY1 yeast isolate cultivated with and without ochratoxigenic fungi (control)	39
Graph 3. Growth pattern of WBY2 yeast isolate cultivated with and without ochratoxigenic fungi (control)	39
Graph 4. Growth pattern of WBY3 yeast isolate cultivated with and without ochratoxigenic fungi (control)	40
Graph 5. Growth pattern comparison of ochratoxigenic fungi cultivated with and without WBY1 yeast isolate (control)	43
Graph 6. Growth pattern comparison of ochratoxigenic fungi cultivated with and without WBY2 yeast isolate (control)	43
Graph 7. Growth pattern comparison of ochratoxigenic fungi cultivated with and without WBY3 yeast isolate (control)	43
Graph 8. Comparison of OTA production by fungi isolates influenced by yeast isolates	50
