ABSTRAK

Penelitian ini bertujuan untuk menguji peran *parenting self-efficacy* sebagai mediator pada hubungan antara dukungan suami dan keterlibatan ibu dalam pendidikan anak, terutama di masa pandemi Covid-19. Hipotesis dalam penelitian ini yaitu *parenting self-efficacy* berperan sebagai mediator hubungan antara dukungan suami dan keterlibatan ibu dalam pendidikan anak. Responden penelitian (N = 182) adalah ibu bekerja yang mempunyai anak SD dan tinggal dalam satu rumah dengan suami. Pengumpulan data menggunakan skala keterlibatan orangtua, skala SEPTI (*Self Efficacy for Parenting Task Index*), dan skala dukungan suami. Analisis mediasi dilakukan menggunakan macro PROCESS dari Hayes. Hasil analisis menunjukkan bahwa *parenting self-efficacy* terbukti memediasi hubungan antara dukungan suami dan keterlibatan ibu dalam pendidikan anak. Dukungan suami dapat meningkatkan *parenting self-efficacy* seorang ibu dan selanjutnya dapat meningkatkan keterlibatan ibu dalam pendidikan anak.

Kata Kunci: *keterlibatan ibu dalam pendidikan anak, parenting self-efficacy, dukungan suami*

ABSTRACT

This study aims to examine the role of parenting self-efficacy as a mediator on the relationship between husband's support and maternal engagement in children's education, especially during the Covid-19 pandemic. The hypothesis in this study is that parenting self-efficacy acts as a mediator of the relationship between husband's support and maternal engagement in children's education. Research respondents (N: 182) are mothers with elementary school children and live in the same house with their husbands. The data were collected using the parental engagement scale, the SEPTI scale (Self Efficacy for Parenting Task Index), and the husband's support scale. The mediation analysis was performed using the PROCESS macro from Hayes. The results of the analysis show that parenting self-efficacy is proven to mediate the relationship between husband's support and maternal engagement in children's education. Husband's support can increase a mother's parenting self-efficacy and can further increase mother's engagement in children's education.

Keywords: *maternal engagement in children's education, parenting self-efficacy, husband's support*
