LIST OF APPENDICES.....	xvii
 I. INTRODUCTION.....	 1
A. Background.....	1
B. Formulation of Problem.....	5
C. Research Authenticity.....	6
D. Research Objective.....	6
E. Benefits of Research.....	7
 II. LITERATURE OVERVIEW.....	 8
A. Literature Review.....	8
1. Buccal mucosa.....	8
2. Pathological condition of oral epithelial cells.....	12
3. Benzene.....	19
a. Definition and characteristic of benzene.....	19
b. Source of exposure of benzene towards human.....	21
c. Toxicity of benzene.....	23
B. Theoretical Basis.....	25
C. Hypothesis.....	26
 III. RESEARCH METHOD.....	 27
A. Research Design.....	27
B. Identification of Variables.....	27
C. Operational Definitions.....	28
D. Research Population.....	29
E. Apparatus and Materials.....	30
F. Research Procedures.....	31
G. Analyzation of Data.....	35

H. Research Steps.....	36
IV. RESULTS AND DISCUSSION.....	37
A. RESULTS.....	37
B. DISCUSSION.....	42
V. CONCLUSION AND SUGGESTIONS.....	46
A. CONCLUSION.....	46
B. SUGGESTIONS.....	46
BIBLIOGRAPHY.....	47
APPENDICES.....	

LIST OF TABLES

Table	Page
1. The comparison of the mean frequency of pyknotic cells in each buccal mucosal epithelial cell layer of the control subjects and the exposed group (gas station workers).....	39
2. The results of independent sample t-test by using the criterial of equal variances not assumed ($p < 0.05$).....	40
3. Summary results of the independent sample t-test by using the criterial of equal variances not assumed of the pyknotic cells frequency in each epithelial cell layer between both groups ($p < 0.05$).....	41

LIST OF FIGURES

Figure	Page
1. Relationships among non-keratinized stratified squamous oral epithelium, lamina propria, and submucosal tissue in buccal mucosa (Avery <i>et. al.</i> , 2006).....	12
2. Exfoliated buccal epithelial cells showing various nuclei anomalies (A) normal nucleus; (F) KH=Karyohexic nucleus, (G) KL=Karyolysis nucleus (H) PK=pkynotic nucleus (Yadav <i>et al.</i> , 2015).....	15
3. The pyknotic nucleus (→) in the buccal mucosa epithelial cells appeared denser, smaller and stained uniformly darker than the nucleus of the normal cell (○). The cells that are stained in blue are the examples of parabasal cells.....	34
4. The (→) shows the appearance of superficial cells (S), intermediate cells (I) and basal-parabasal cells (B) with Papanicolaou Stain (Casallas, 2012).....	35
5. The comparison between the frequency of the pyknotic cells in the control subject's intermediate buccal mucosa epithelial cells (A) and the gas station worker's intermediate buccal mucosa epithelial cells (B). It showed that the gas station workers had higher frequency of pyknotic cells in the intermediate buccal mucosa epithelial cells than the control subjects.....	38
6. Mean and standard deviation of the pyknotic cells frequency in each epithelial cell layer of the control group and exposed group.....	39

LIST OF APPENDICES

Appendix

I.	Ethical Clearance (Ethic Committee Approval).....
II.	Research Permission Letter for Pertamina Gas Station Yogyakarta.....
III.	Research Permission Letter for Anatomical Pathology and Parasitology Laboratory of Medical Faculty.....
IV.	Research Permission Letter for Histology Laboratory of Dental Faculty.....
V.	Research Permission Letter from Pertamina Gas Station Yogyakarta.....
VI.	Letter of Completion of Papanicolaou Staining in Anatomical Pathology Laboratory of Medical Faculty.....
VII.	Letter of Completion of Collecting Data from Pertamina Gas Station Yogyakarta.....
VIII.	Informed Consent Research.....
IX.	Research Questionnaire.....
X.	Frequency Data of the Pyknotic Nuclei in Each Buccal Mucosa Epithelial Cell Layer of the Control Subjects.....
XI.	Frequency Data of the Pyknotic Nuclei in Each Buccal Mucosa Epithelial Cell Layer of the Exposed Group.....
XII.	Normality Test (Shapiro- Wilk Test) on the Total Mean Number of Pyknotic Cells of the Control Subjects and Exposed Group.....
XIII.	Homogeneity Test (Levene's Test) and Independent Student T-Test (Equal Variances not Assumed) on the Total Mean Number of Pyknotic Cells of the Control Subjects and Exposed Group.....
XIV.	Homogeneity Test (Levene's Test) and Independent Student T-Test on the Mean Number of Pyknotic Cells in Each Buccal Mucosa Epithelial Cell Layer of the Control Subjects and Exposed Group.....

XV. Documentation of Apparatus and Materials of the Study.....
