COVER PAGE	i
APPROVAL PAGE	ii
DECLARATION	iii
PREFACE	iv
TABLE OF CONTENT	v
LIST OF TABLES	vii
LIST OF FIGURE.....	ix
ABSTRACT	xi
CHAPTER 1 INTRODUCTION.....	1
1. 1. Background	1
1. 2. Research Objectives	2
1. 3. Advantage of Research	2
1. 4. Scope of Research	2
CHAPTER 2 LITERATURE REVIEW.....	3
2. 1. Flood Disaster	3
2. 2. ArcGIS	3
2. 3. HEC-GeoRAS	4
2. 4. Software Analysis: HEC-RAS v. 5.0.....	4
2. 5. Software Analysis: InaSAFE v. 3.5.2	5
2. 6. Previous Study	5
CHAPTER 3 THEORITICAL BASED	7
3. 1. Flood Modeling.....	7
3. 1. 1. Hydrology Analysis	7
3. 1. 2. Hydraulic Analysis.....	16
3. 2. Direct Physical Damage.....	18
CHAPTER 4 METHODOLOGY	21
4. 1. Description of research location	21
4. 2. Data collection	22
4. 3. Flow chart of research.....	23
4. 4. Simulation Scenario	23
CHAPTER 5 ANALYSIS AND DISCUSSION	25
5. 1. Hydrology Analysis	25
5. 1. 1. Design Rainfall	25
5. 1. 2. Syntethic Unit Hydrograph Nakayasu	31

5. 1. 3. Design Flood Discharge.....	32
5. 2. Map Layer Analysis	38
5. 2. 1. Topography Map Analysis.....	38
5. 2. 2. Building Exposure Analysis	40
5. 3. Field Survey	41
5. 4. Geometry Data Analysis	43
5. 5. Hydraulic Analysis.....	46
5. 5. 1. Input Data on HEC-RAS Version 5.0.....	46
5. 5. 2. Simulation Scenarios.	51
5. 6. Analysis.....	55
5. 6. 1. Flow-Frequency Function	56
5. 6. 2. Stage-Flow Function.....	57
5. 6. 3. Stage-Loss Function.....	58
5. 6. 4. Average Annual damage (AAD).....	68
CHAPTER 6 CONCLUSION AND RECOMMENDATION	72
6. 1. Conclusion	72
6. 2. Recommendations	72
BIBLIOGRAPHY	74
APPENDIX	76

LIST OF TABLES

Table 3.1 Flood depth index (BNPB, 2012)	19
Table 4.1 Research boundary	22
Table 4.2 Data Collection	22
Table 4.3 Simulation scenarios.	24
Table 5.1 Maximum daily rainfall data (2006-2015).....	26
Table 5.2 Design rainfall.....	26
Table 5.3 Rainfall duration.	27
Table 5.4 Control of rainfall duration.	27
Table 5.5 Rainfall distribution for 2 year return period.....	27
Table 5.6 Rainfall distribution for 5 year return period.....	28
Table 5.7 Rainfall distribution for 10 year return period.....	28
Table 5.8 Rainfall distribution for 25 year return period.....	28
Table 5.9 CN value for Winongo Watershed.....	29
Table 5.10 CN Parameters.	29
Table 5.11 Effective rainfall for 5 years flood.....	30
Table 5.12 Effective rainfall for 5 years flood.....	30
Table 5.13 Effective rainfall for 10 years flood.....	30
Table 5.14 Effective rainfall for 25 years flood.....	30
Table 5.15 Parameters of Nakayasu.....	31
Table 5.16 SUH Nakayasu.....	31
Table 5.17 Discharge for 2 years flood.....	33
Table 5.18 Discharge for 5 years flood.....	34
Table 5.19 Discharge for 10 years flood.....	35
Table 5.20 Discharge for 10 years flood.....	36
Table 5.21 Discharge for 25 years flood.....	37
Table 5.22 Maximum flood elevation.....	53
Table 5.23 Maximum water elevation and stage on station 1400.....	55
Table 5.24 Flood-Frequency matrix.....	56
Table 5.25 Stage-Flow matrix.....	57
Table 5.26 Flood depth index (BNPB, 2012)	58
Table 5.27 Flood loss index	59
Table 5.28 Input for InaSafe software	59
Table 5.29 Affected structures (Q2).	61
Table 5.30 Estimated loss for Winongo flood with 2 years return period.....	61
Table 5.31 Affected structures (Q5)	63
Table 5.32 Estimated loss for Winongo flood with 5 years return period.....	63
Table 5.33 Affected structures (Q10)	65
Table 5.34 Estimated loss for Winongo flood with 10 years return period.....	65
Table 5.35 Affected structures (Q25)	67
Table 5.36 Estimated loss for Winongo flood with 25 years return period.....	67
Table 5.37 Stage-Loss matrix	68
Table 5.38 Development of Loss-Frequency matrix	69

Table 5.39 Interpolated loss-frequency matrix 69

LIST OF FIGURE

Figure 3.1 Thiessen Polygon.....	8
Figure 3.2 ABM for Rainfall Distribution	13
Figure 3.3 Graph of Nakayasu	15
Figure 3.4 Scheme of the Unsteady Flow	17
Figure 3.5 Longitudinal Profile and Energy Lines on the River.....	18
Figure 3.6 Depth-damage functions are applied to relevant depth of flooding	19
Figure 3.7 Basic function to get EAD.....	20
Figure 4.1 Winongo River.	21
Figure 4.2 Flow chart of the research	23
Figure 5.1 Thiessen Polygon.....	25
Figure 5.2 Graph of SUH Nakayasu.	32
Figure 5.3 Flood discharge for 2 years return period.....	34
Figure 5.4 Flood discharge for 5 years return period.....	35
Figure 5.5 Flood discharge for 10 years return period.....	36
Figure 5.6 Flood discharge for 25 years return period.....	38
Figure 5.7 Flow step to make topography map.....	39
Figure 5.8 New Digital Terrain Model	40
Figure 5.9 Flow step to make building exposure	41
Figure 5.10 Edited building exposure.	41
Figure 5.11 Interview section.	42
Figure 5.12 Field measurement using rotating leser level device.....	43
Figure 5.13 Drawing Stream Centerline, Bank lines, and Flow path lines.....	44
Figure 5.14 Assign river name.	44
Figure 5.15 River cross-section.	45
Figure 5.16 Exporting HEC-GeoRAS data.....	45
Figure 5.17 HEC-RAS 5.0 program layout.	46
Figure 5.18 HEC-RAS 5.0 new project.	46
Figure 5.19 Import from GIS format.	47
Figure 5.20 Arranging the river station.....	47
Figure 5.21 Geometry data.....	48
Figure 5.22 Bridge on station 1720.....	49
Figure 5.23 Bridge on station 1350.....	49
Figure 5.24 River profile plot	50
Figure 5.25 Rating curves.	51
Figure 5.26 Extrapolated on Bridge 1720.....	52
Figure 5.27 Extrapolated on river station 1350.....	52
Figure 5.28 Maximum velocity on the main channel.	53
Figure 5.29 Calibration with inundation map 2015 from FKWA (Q25).....	54
Figure 5.30 Stage-Flow index on the field.....	55
Figure 5.31 Flood Frequency curve.	57
Figure 5.32 Stage-Flow curve.....	58

Figure 5.33 structures affected by flood with 2 years return periods.	60
Figure 5.34 Structures affected by flood with 5 years return periods.....	62
Figure 5.35 Structures affected by flood with 10 years return periods.....	64
Figure 5.36 Structures affected by flood with 25 years return periods.....	66
Figure 5.37 Stage-Loss curve.	68
Figure 5.38 Loss-Frequency curve.....	70
