<b>TITTLE</b>	<b>i</b>
<b>RATIFICATION</b>	<b>ii</b>
<b>ASSERTION</b>	<b>iii</b>
<b>ACKNOWLEDGEMENTS</b>	<b>iv</b>
<b>TABLE OF CONTENTS</b>	<b>v</b>
<b>LIST OF TABLES</b>	<b>viii</b>
<b>LIST OF FIGURES</b>	<b>x</b>
<b>ABSTRACT</b>	<b>xi</b>
<b>CHAPTER 1 - INTRODUCTION</b>	
1.1 Background	1
1.2 Problem Formulation	3
1.3 Research Authenticity	4
1.4 Research Benefits	4
1.5 Research Objectives	5
<b>CHAPTER 2 - LITERATURE REVIEW</b>	
2.1 Factors Leading to Self-Medication	7
2.2 Ease of Accessibility to Drugs	10
2.3 Antibiotic/ Antimicrobial Resistance	11

2.4 Common Conditions Leading to Self-Medication-----	14
2.5 Theoretical Framework-----	17
2.6 Conceptual Framework-----	18

### **CHAPTER III - RESEARCH METHODOLOGY**

3.1 Research Design-----	19
3.2 Research Setting and Time-----	19
3.3 Sample Size and Population Sampling-----	19
3.4 Inclusion and Exclusion Criteria-----	20
3.5 Data Collection-----	21
3.6 Research Instrument-----	22
3.7 Procedure and Course of Study-----	24
3.8 Study Variables-----	26
3.9 Operational Definitions-----	27
3.10 Statistical Analysis-----	28
3.11 Study Cost-----	29
3.12 Ethical Consideration-----	29

### **CHAPTER IV - RESULTS AND DISCUSSION**

4.1 Results-----	30
4.2 Discussion-----	53
4.3 Limitations of Research-----	66

**CHAPTER V - CONCLUSION AND SUGGESTIONS**

5.1 Conclusion-----67

5.2 Suggestions-----68

**REFERENCES-----70**

**APPENDIX-----76**

## LISTS OF TABLES

- Table 1** - Sociodemographic characteristics of study population
- Table 2** - Prevalence of self-medication within past 1 year
- Table 3** - Distribution of students who do not self-medicate and who self-medicate based on year of undergraduate study
- Table 4** - Distribution of prices paid for drugs in the past 1 year among students who self-medicate
- Table 5** - Students who self-medicate with previously prescribed drugs and who do not
- Table 6** - Most common sources of obtaining non-prescribed drugs
- Table 7** - Most common sources of obtaining information about drugs that students self-medicate with
- Table 8** - Cure rate when self-medicating with antibiotics
- Table 9** - Adverse events experienced when self-medicating with antibiotics and OTC drugs
- Table 10** - Students' perceived knowledge on drugs that they self-Medicate with
- Table 11** - Reasons for self-medicating
- Table 12** - Most common conditions for self-medication
- Table 13** - Most common OTC drugs for self-medication
- Table 14** - Most common antibiotics for self-medication

- Table 15** - Future decision to stop self-medication with antibiotics
- Table 16** - Distribution of students finishing antibiotic regimen when on antibiotic treatment
- Table 17** - Distribution of students storing unfinished antibiotics
- Table 18** - Storage patterns of antibiotics
- Table 20** - Distribution of students who check for drug interactions when consuming more than one drug
- Table 21** - Students' responses as to whether self-medication rates will decrease if health services improve
- Table 22** - Students' responses as to whether antibiotics can be used to treat both bacterial and viral infections
- Table 23** - Distribution of students' responses based on year of study as to whether antibiotics can be used to treat both bacterial and viral infections
- Table 24** - Distribution of students' awareness on antibiotic resistance
- Table 25** - Distribution of initial source of hearing about antibiotic resistance
- Table 26** - Distribution of students' responses as to whether an unfinished antibiotic regimen can lead to an increased rate of antibiotic resistance

## **LISTS OF FIGURES**

- Figure 1** - Distribution of self-medication based on year of undergraduate study (n=47)
- Figure 2** - Distribution of self-medication with amoxicillin among students self-medicating with antibiotics based on year of undergraduate study (n=45)
- Figure 3** - Distribution of correct answers as to whether antibiotics can be used to treat both bacterial and viral infections based on year of undergraduate study (n=96)
