LIST OF TABLES	xii
LIST OF FIGURES	xiii
LIST OF ATTACHMENTS	xiv
ABBREVIATIONS	xvi
ABSTRACT	xvii
INTISARI	xviii
I. INTRODUCTION	
A. Background of Problem.....	1
B. Problem Statement	4
C. Research Authenticity.....	4
D. Research Objective.....	5
E. Research Benefits.....	5
II. LITERATURE REVIEW	
A. Literature Study	6
1. Fiber-Reinforced Composite.....	6
1.1 History and development of Fiber-Reinforced Composite	6
1.2 General characteristics.....	6
1.3 Composition.....	7
1.3.1 Matrix.....	7
1.3.2 Fiber	8
1.4 Fiber-Reinforced Composite in Dentistry.....	9
1.4.1 Applications of FRC in dentistry.....	9
1.4.2 Crown and bridge.....	10
2. Polyethylene Fiber.....	10
2.1 Properties.....	10
2.2 Polyethylene Fiber-Reinforced Composite.....	11
3. Mouthwashes.....	12
3.1 Definition of mouthwash.....	12
3.2 Function of mouthwash.....	12
3.3 Composition of mouthwash.....	13
3.4 Degradation and erosion of composite.....	14
3.5 Effect of alcohol on flexural strength.....	17
3.6 Effect of immersion time in mouthwash on flexural	18
strength.....	
4. Flexural Strength.....	20

4.1 Definition and calculation of flexural strength.....	20
4.2 Clinical significance of flexural strength test.....	21
B. Theoretical Framework.....	22
C. Hypothesis.....	23
III. RESEARCH METHODOLOGY	
A. Type of Research.....	24
B. Identification of Variables.....	24
C. Sample Study.....	25
D. Sample Size Determination	25
E. Definition of Operational Variables.....	26
F. Materials and Instruments.....	26
G. Research Venue.....	27
H. Research Method	28
1. Ethical clearance.....	28
2. Preparation of sample.....	28
3. Treatment.....	29
4. Flexural strength test.....	30
I. Data Analysis	31
J. Schematic Diagram of Research Flow.....	32
IV. RESULTS AND DISCUSSION	
A. Results.....	33
B. Discussion.....	36
V. CONCLUSION AND SUGGESTIONS	
A. Conclusion.....	44
B. Suggestions.....	44
REFERENCES	45
ATTACHMENTS.....	52

LIST OF TABLES

Table	Page
1. Treatment for each group samples.....	28
2. Mean and standard deviation for flexural strength (MPa).....	33
3. Results of Shapiro-Wilk and Levene's Test.....	34
4. Results of One Way ANOVA Test.....	34
5. Results of LSD post hoc test.....	35
6. Data of maximum load in three point bending test.....	55
7. Mean and standard deviation of flexural strength of PE FRC.....	59

LIST OF FIGURES

Figure	Page
1. Structure of resin matrices.....	7
a. Bis – GMA.....	7
b. UDMA.....	7
c. TEGDMA.....	7
2. Schematic of unidirectional fiber-reinforced composite.....	8
3. Schematic of the chemical structures of polyethylene.....	10
4. Schematic of the physical effect of a plasticizer molecule in separating polymer chains and producing softening by reducing the effectiveness of entanglements.....	16
5. Schematic of three-point flexure test.....	20
6. Immersion of UHMWPE FRC sample.....	30
7. Schematic of three-point flexure test.....	31
8. Schematic diagram of research.....	32
9. Construct TM braided polyethylene fiber.....	65
10. Brass mould with the dimension of 25x2x2mm.....	65
11. Flowable composite Master Flow Biodinamica.....	65
12. Mouthwash Listerine Multi Protect.....	65
13. UHMWPE fibers in desiccator.....	66
14. LED Curing Unit.....	66
15. Treatment of UHMWPE FRC samples in mouthwash.....	66
16. Universal Testing Machine.....	66

LIST OF ATTACHMENTS

Attachment	Page
I. Ethical clearance	52
II. Certificate of completion from Integrated Research Laboratory of Faculty of Dentistry Gadjah Mada University	53
III. Certificate of completion from Material Laboratory of Department of Mechanical and Industrial Engineering Faculty of Engineering Gadjah Mada University	54
IV. Flexural strength measurement	55
V. Mean and standard deviation of flexural strength of PE FRC	59
VI. Descriptive data of flexural strength of PE FRC	60
VII. Shapiro-Wilk Test (Normality test)	61
VIII. Levene's Test (Homogeneity test)	62
IX. Analysis of Variance (ANOVA)	63
X. Least Significance Difference (LSD) Post-Hoc Test	64
XI. Experimental pictures	65

ABBREVIATIONS

Abstr.	Abstract
ANOVA	Analysis of variance
bis-GMA	Bisphenol glycidyl methacrylate
°C	Degree celsius
E-glass	Electrical glass
Ed	Edition
FDP	Fixed dental prostheses
Fig	Figure
FRC	Fiber-reinforced composite
FS	Flexural strength
G	Group
h	Hour
Int	International
IPN	Interpenetrating polymer network
min	Minute
mm	Millimeter
MMA	Methylmethacrylate
MPa	Megapascal
µm	Micrometer
N	Newton
n	Number of specimens per group
s	Second
p	Page
pp	Range of pages
PE	Polyethylene
PMMA	Poly(methylmethacrylate)
Semi-IPN	Semi-Interpenetrating polymer network
SD	Standard deviation
TEGDMA	Triethylene glycol dimethacrylate
UDMA	Urethane dimethacrylate
UHMWPE	Ultra-high-molecular weight polyethylene
