DECLARATION	i
ABSTRACT.....	ii
ACKNOWLEDGMENT.....	iv
TABLE OF CONTENT	v
LIST OF FIGURES	x
LIST OF TABLES	xiii
LIST OF ABBREVIATION.....	xv
INTRODUCTION	1
1.1 Background.....	1
1.1.1 The Impact of Urbanization and Population Growth	2
1.1.2 Highlight on Energy Crisis in Nepal	4
1.1.3 Political Instability, Economic Blockade and Fuel Dependency	6
1.2 State of the Art of the Research	7
1.3 The Problem Statement.....	11
1.4 The Research Questions.....	12
1.5 The Research Objectives.....	12
1.6 Novelty and Value Added of the Research Outcomes.....	13
1.7 Scope and Limitation of the Study.....	14

CHAPTER 2	15
LITERATURE REVIEW	15
2.1 Theoretical Background.....	15
2.1.1 Urban Energy Systems.....	15
2.1.2 Concept of Sustainable City.....	18
2.1.3 Renewable Energy in Urban Areas: An Energy Geography Perspective	20
2.1.3.1 The Overview of Energy Geography	20
2.1.3.2 Geography and Energy Transition	22
2.1.3.3 Renewable Energy in Urban Area	24
2.1.4 Human Behaviour on Energy Use	26
2.1.5 Scenario Analysis on Energy Planning.....	27
2.1.6 Energy Policy Around the World	29
2.1.7 Energy Policies in Nepal.....	30
2.1.8 Basic Approach of Energy Modelling	32
2.1.9 Modelling using LEAP software	34
2.2 Conceptual Framework.....	38
CHAPTER 3	41
RESEARCH METHODOLOGY.....	41
3.1 Research Location Overview.....	41
3.2 Data Collection	43
3.3 Scenario Development.....	45

3.4	Data Analysis.....	57
3.4.1	Activity Analysis	59
3.4.2	Spatial and Temporal Analysis	63
3.5	Interconnecting with Qualitative Data.....	64
CHAPTER 4		65
DATA ANALYSIS AND FINDINGS		65
4.1	Topography of Kathmandu Valley and Air Pollution.....	65
4.2	Energy Consumption Behaviour.....	68
4.2.1	Energy Consumption Behaviour in Kathmandu Metropolitan City	74
4.2.2	Energy Consumption Behaviour in Lalitpur Sub Metropolitan City	75
4.2.3	Energy Consumption Behaviour in Bhaktapur Municipality	76
4.2.4	Energy Consumption Behaviour in Kirtipur Municipality	77
4.2.5	Energy Consumption Behaviour in Madhyapur Thimi Municipality.....	78
4.3	Energy Consumption Pattern	79
4.4	Scenario Analysis.....	81
4.4.1	Business As Usual (BAU) Scenario	82
4.4.1.1	Energy Demand Prediction	82
4.4.1.2	Environmental Impact.....	86
4.4.1.3	Social Cost Benefit Analysis	89
4.4.2	Solar Radiation (SR)	91
4.4.2.1	Energy Demand Prediction	91
4.4.2.2	Environmental Impact.....	94

4.4.2.3 Social Cost Benefit Analysis	95
4.4.3 Solid Waste (SW)	96
4.4.3.1 Energy Demand Prediction	96
4.4.3.2 Environmental Impact.....	98
4.4.3.3 Social Cost Benefit Analysis	100
4.4.4 Electric Cookers (EC)	101
4.4.4.1 Energy Demand Prediction	101
4.4.4.2 Environmental Impact.....	102
4.4.4.3 Social Cost Benefit Analysis	104
4.4.5 Electric Vehicles (EV)	105
4.4.5.1 Energy Demand Prediction	106
4.4.5.2 Environmental Impact.....	107
4.4.5.3 Social Cost Benefit Analysis	108
4.4.6 Comprehensive Scenario in Comparison with Other Scenarios	109
4.4.6.1 Energy Demand Prediction	110
4.4.6.2 Environmental Impact.....	113.
4.4.6.3 Social Cost Benefit Analysis	113
4.5 Capacity Analysis of Energy Sources in Kathmandu Valley	114
4.6 Sensitivity Analysis on Economic Aspect of Energy Demand.....	116
CHAPTER 5	121
DISCUSSION	121
5.1 Earthquake and Power Supply Disturbance.....	121

5.2 Fossil Fuel Dependency.....	125
5.3 Suppressed Demand.....	127
5.4 Policy Implications	129
5.4.1 Policy Implication of Electric Vehicles Scenario	132
5.4.2 Policy Implication of Electric Cooker Scenario	135
5.4.3 Policy Implication of Solid Waste Scenario	136
5.4.4 Policy Implication on Solar Radiation Scenario	136
5.5 Political Obstacles on The Development of Energy Sector in Nepal	138
5.6 Initiative on Sustainable Urban Transport in Kathmandu Valley.....	140
5.7 The Energy Model Framework.....	142
CHAPTER 6	144
CONCLUSION AND RECOMMENDATION.....	144
6.1 Conclusion	144
6.2 Recommendation	147
6.2.1 Recommendation for Future Research Works	147
6.2.2 Recommendation for the Improvement of Energy Practices	148
REFERENCES	150

UNIVERSITAS
GADJAH MADA

**URBAN ENERGY SCENARIO FROM THE PERSPECTIVE OF ENERGY GEOGRAPHY: A CASE OF
KATHMANDU VALLEY**

SHRESTHA, MARIA EMERITA INDRANINGRUM, Prof. Dr. Junun Sartohadi, M.Sc. ; Dr. Dyah Rahmawati Hizbaron,
Universitas Gadjah Mada, 2017 | Diunduh dari <http://etd.repository.ugm.ac.id/>

LIST OF FIGURES

Figure 1. 1	Projection of built-up area of Kathmandu Valley	3
Figure 1. 2	The development of energy research, energy transition and energy policies.....	7
Figure 2.1	Impact of urbanization on urban structure and energy demand	17
Figure 2. 2	The overlapping subfields in geography	22
Figure 2. 3	The overlapping subfields in geography	25
Figure 2. 4	The structure of LEAP model.....	38
Figure 2. 5	Conceptual framework	40
Figure 3. 1	Map of Kathmandu Valley with its five administrative cities.....	42
Figure 3. 2	Solar irradiation map of Nepal	54
Figure 3. 3	Composition of solid waste in Kathmandu Valley.....	55
Figure 4. 1	Topography of Kathmandu Valley. (a) Elevation map of Kathmandu Valley (b) Schematic geologic cross-section of the Kathmandu basin sediments during the late Pleistocene (Sakai et al., 2002)	66
Figure 4. 2	Thermal inversion over Kathmandu Valley during winter.....	68
Figure 4. 3	The distribution of total energy expenses in urban area of Kathmandu Valley	72
Figure 4. 4	The distribution of solar energy usage in urban area of Kathmandu Valley.....	73
Figure 4. 5	The distribution of solid waste self-management in urban area of Kathmandu Valley	74
Figure 4. 6	Sectoral Energy Consumption in 2015 and 2035 under BAU Scenario	80

Figure 4. 7 Energy mix in 2015 and 2035 under BAU scenario.....	81
Figure 4. 8 Energy demand prediction under BAU scenario	82
Figure 4. 9 Fuel consumption prediction under BAU scenario	83
Figure 4. 10 Energy demand prediction in the household sector.....	84
Figure 4. 11 Fuel consumption trend in household sector under BAU scenario	84
Figure 4. 12 Prediction of energy demand in industrial sector under BAU	86
Figure 4. 13 Fuel consumption trend in industrial sector under BAU scenario	86
Figure 4. 14 Prediction of total energy consumption in transportation sector under BAU scenario	87
Figure 4. 15 Fuel consumption trend in transportation sector under BAU scenario ..	88
Figure 4. 16 Sectoral environmental impact under BAU	89
Figure 4. 17 Environmental impact by fuel under BAU scenario	89
Figure 4.18 Social Cost under BAU	90
Figure 4. 19 Energy demand prediction SR vs BAU.....	92
Figure 4. 20 Energy demand prediction for lighting SR vs BAU.....	93
Figure 4. 21 Environmental Impact SR vs BAU	94
Figure 4. 22 Social cost BAU vs SR.....	96
Figure 4. 23 Energy demand prediction SW vs BAU.....	98
Figure 4. 24 Environmental Impact SW vs BAU	99
Figure 4. 25 Social cost SR vs BAU.....	100
Figure 4. 26 Energy Demand Prediction EC vs BAU	102
Figure 4. 27 LPG and electricity demand prediction under EC scenario	102
Figure 4. 28 Environmental impact EC vs BAU	103

Figure 4. 29 GHG emission from cooking activities EC vs BAU	104
Figure 4. 30 Social cost EC vs BAU.....	105
Figure 4. 31 Energy demand prediction EV vs BAU	106
Figure 4. 32 Environmental impact EV vs BAU	107
Figure 4. 33 Transportation sector's GHG emission EV vs BAU	108
Figure 4. 34 Social Cost EV vs BAU	109
Figure 4. 35 Energy demand prediction of various scenarios.....	110
Figure 4. 36 GHG emission of various scenario.....	113
Figure 4. 37 Social cost prediction of various scenario	114
Figure 4. 38 Committed capacity of renewable energy in Kathmandu Valley.....	116
Figure 4. 39 Projection of income elasticity of energy demand under various scenario: a) BAU b) SR c) SW d) EV e) EC f) Comprehensive	119
Figure 5. 1 Satellite image of light emission post mega earthquake in Nepal.....	122
Figure 5. 2 Government authority selling wood during the fuel crisis	125
Figure 5. 3 Illustration of suppressed demand	128
Figure 5. 4 Energy demand prediction excluding Comprehensive scenario	130
Figure 5. 5 GHG emission prediction excluding Comprehensive scenario.....	130
Figure 5. 6 Social cost prediction excluding Comprehensive scenario	131
Figure 5. 7 Electric trolley bus introduced in 1975 in Kathmandu.....	141
Figure 5. 8 The energy model framework in 2035 under BAU.....	143
Figure 5. 9 The energy model framework by 2035 under Comprehensive scenario.....	143

LIST OF TABLES

Table 1.1 Research and paper works on energy studies in Nepal.....	10
Table 2. 1 Potential change in the low-carbon transition.....	23
Table 3. 1 Key assumption for LEAP.....	46
Table 3. 2 Estimation of activity level and energy intensity electric appliances in household sector	47
Table 3. 3 Estimation of activity level and energy intensity of non-electrical appliances in household sector.....	48
Table 3. 4 Method and tool to achieve the research objectives	58
Table 3. 5 Cost components required for cost benefit analysis on LEAP	61
Table 3. 6 Cost benefit analysis input.....	62
Table 4. 1 Coefficient correlation of factors that influence household energy expenses	69
Table 4. 2 Municipality profile on energy expenses, renewable energy usage and environmental awareness.....	71
Table 4. 3 Sectoral GHG emission SR vs BAU.....	95
Table 4. 4 Sectoral GHG emission SW vs BAU	99
Table 4. 5 Sectoral GHG emission EC vs BAU	104
Table 4. 6 Sectoral GHG emission EV vs BAU	108
Table 4. 7 Prediction of energy demand in Kathmandu Valley.....	111

Table 4. 8 Projection of population in Kathmandu Valley	111
Table 4. 9 Energy per capita of Kathmandu Valley.....	112
Table 5. 1 Status of various hydropower projects after the earthquake.....	124
Table 5. 2 Comparison matrix of scenarios' performance.....	131
