

LIST OF CONTENTS

PENGESAHAN	ii
ACKNOWLEDGEMENT	iii
LIST OF CONTENTS	v
LIST OF TABLES	vii
LIST OF FIGURES	viii
LIST OF GRAPHS	x
INTISARI.....	xi
ABSTRACT	xii
 INTRODUCTION	 1
Research Background.....	1
Objective	2
Benefit	2
 LITERATURE REVIEW.....	 3
<i>Staphylococcus aureus</i>	3
Structure	4
Extracellular Toxins	5
Staphylococcal Enterotoxin B (SEB)	6
Mechanism of Actions.....	6
Small Animal Models of Food Allergy.....	8
Haematological Parameters	8
Neutrophils	9
Lymphocytes	11
Eosinophils	11
Basophils	12
Monocytes	13
Histology	14
Liver	14
Kidney	15
 HYPOTHESIS	 17
 MATERIALS AND METHODS	 18
Materials.....	18
Materials	18
Tools and apparatus	18
Methods	18
Staphylococcal Enterotoxin B (SEB) suspension.....	18
Bacterial infection into animal models.....	19
Haematological examinations	19
Histopathological examinations	19

RESULTS AND DISCUSSION	20
Results	20
Haematological examinations	20
Histopathological examinations	25
Discussion	32
Haematological examinations	32
Total leucocytes count (TLC)	32
Total segmented neutrophils count	33
Total band neutrophils count	33
Total lymphocytes count	34
Total monocytes count	34
Total eosinophils count	35
Histopathological examinations	35
CONCLUSION AND SUGGESTION	41
Conclusion	41
Suggestion	41
REFERENCES	42
ATTACHMENTS	
Haematological rates for Balb/c mice	45
Research documentations	46
Ethical clearance	48
Statistical test data	49
Blood test results	54

LIST OF TABLES

Table 1.	Enteric, lung, and skin models for staphylococcal superantigens (Krakauer and Stiles, 2013).....	7
Table 2.	Haematological parameters for Balb/c male mice (Spinelli <i>et al.</i> , 2014).....	9
Table 3.	The means of blood parameters from Control Group	20
Table 4.	The means of blood parameters from Test Group	21
Table 5.	<i>P</i> – values obtained from SPSS.....	25

LIST OF FIGURES

Figure 1.	Gram-stain of a <i>S. aureus</i> stock culture (Leboffe and Pierce, 2011).....	3
Figure 2.	Structure of a typical <i>Staphylococcus</i> cell (Carter and Wise, 2004)	5
Figure 3.	Superantigens and the nonspecific stimulation of T-cells (Ahanotu <i>et al.</i> , 2006)	7
Figure 4.	Segmented neutrophilic granulocytes (Theml <i>et al.</i> , 2004)	10
Figure 5.	Antimicrobial activity of neutrophil (Weiss and Wardrop, 2010)	10
Figure 6.	Normal lymphocytes (Theml <i>et al.</i> , 2004)	11
Figure 7.	Eosinophilic granulocytes with corpuscular, orange-stained granules (Theml <i>et al.</i> , 2004)	12
Figure 8.	Basophilic granulocytes with corpuscular, deep-blue to violet- stained granules (Theml <i>et al.</i> , 2004).....	13
Figure 9.	Typical monocyte with lobed nucleus, gray-blue stained cytoplasm, and fine granulation (Theml <i>et al.</i> , 2004)	13
Figure 10.	Midzonal region of mouse liver with binucleate cells (arrow) (Treuting <i>et al.</i> , 2012)	14
Figure 11.	Male mouse glomerulus with the cuboidal parietal epithelium resembles proximal convoluted tubule epithelium (arrow) (Treuting <i>et al.</i> , 2012)	15
Figure 12.	Male mouse cortex with vacuoles (Treuting <i>et al.</i> , 2012).....	16
Figure 13.	Liver from Control Group D-7 (10x magnification). Hepatocytes are joined to one another in anastomosing plates, with borders, that face either the sinusoids or adjacent hepatocytes	25
Figure 14.	Liver from Test Group D-7 (10x magnification). Leakage of the blood vessel can be seen and caused vasculitis.....	26
Figure 15.	Liver from Test Group D-7 (40x magnification); *Infiltration of leucocytes (black arrows); enlarged nucleus with chromatin defragmentation (blue arrow).....	26
Figure 16.	Liver from Control Group D-22 (10x magnification). Hepatocytes are joined to one another in anastomosing plates, with borders, that face either the sinusoids or adjacent hepatocytes	27
Figure 17.	Liver from Test Group D-22 (10x magnification). Sinusoids are more prominent, indicating condensed hepatocytes	27
Figure 18.	Liver from Test Group D-22 (40x magnification); *Infiltration of leucocytes (black arrow); enlarged nucleus with chromatin defragmentation (blue arrow).....	28
Figure 19.	Liver from Test Group D-22 (40x magnification); *Infiltration of leucocytes (black arrows); lipid vacuolisation (yellow arrows)	28
Figure 20.	Kidney from Control Group D-7 (10x magnification). The tubules are lined by a simple cuboidal epithelium whose cells have several different characteristic features	29

Figure 21.	Kidney from Test Group D-7 (10x magnification). Vasculitis and haemorrhage can be observed	29
Figure 22.	Kidney from Test Group D-7 (40x magnification); *Infiltration of leucocytes (black arrows).....	30
Figure 23.	Kidney from Control Group D-22 (10x magnification). The tubules are lined by a simple cuboidal epithelium whose cells have several different characteristic features	30
Figure 24.	Kidney from Test Group D-22 (10x magnification). Erosion of the epithelial lining are more prominent	31
Figure 25.	Kidney from Test Group D-22 (40x magnification); *Infiltration of leucocytes (black arrows)	31
Figure 26.	Kidney from Test Group D-22 (40x magnification); *Infiltration of leucocytes (black arrows); vacuolisation (yellow arrows).....	32
Figure 27.	Activated band neutrophil of SEB-infected mouse (100x magnification); *Note the toxic vacuolisation in the cytoplasm....	34
Figure 28.	Stages of lymphocytes maturation; illustration from Abbas <i>et al.</i> , 2010.....	35
Figure 29.	Inflammation of the vessel walls in the liver of SEB-infected Mice, also known as vasculitis (10x magnification).....	38
Figure 30.	Enlarged nuclei with defragmented chromatin in the liver of SEB-infected mice as indicated by blue arrow (40x magnification)	39
Figure 31.	Erosion of epithelial mucosal layer and karyopyknotic nuclei in the liver of SEB-infected mice as indicated by green arrow (40x magnification)	40
Figure 32.	Erosion of epithelial mucosal layer of the kidney of SEB-infected mice (40x magnification).....	40

LIST OF GRAPHS

Graph 1	Comparison of Total Leucocytes from Day-1 until Day-22	21
Graph 2	Comparison of Total Segmented Neutrophils from Day-1 until Day-22	22
Graph 3	Comparison of Total Band Neutrophils from Day-1 until Day-22	22
Graph 4	Comparison of Total Lymphocytes from Day-1 until Day-22	23
Graph 5	Comparison of Total Monocytes from Day-1 until Day-22	23
Graph 6	Comparison of Total Eosinophils from Day-1 until Day-22	24
