Manajemen perawatan pasca operasi merupakan salah satu faktor pendukung keberhasilan pelaksanaan operasi. Tujuan penulisan tugas akhir ini adalah untuk mengetahui manajemen perawatan pasien pasca operasi di Klinik Hewan Kayu Manis Yogyakarta. Pengambilan data untuk penulisan tugas akhir ini dilakukan dengan cara observasi, wawancara dengan dokter hewan yang menangani dan praktek langsung mengikuti kegiatan PKL selama 2 minggu (31 Oktober – 11 November 2016) di Klinik Hewan Kayu Manis Yogyakarta. Manajemen perawatan pasien pasca operasi yang dilakukan di Klinik Hewan Kayu Manis yaitu pemindahan pasien ke kandang yang sudah disiapkan, pemberian pakan (Royal Canin® *Recovery*) dan air minum, monitoring luka operasi dilakukan, pemberian obat berupa Glucortin®, Penstrep®, Hematopan® dan *Die da yao zin* sebagai pengganti iodine povidon, pemantauan suhu badan, pencatatan nafsu makan, defekasi dan urinasi pada tabel monitoring pasien. Semua dilakukan dua kali sehari pada pukul 05:00 dan 16:00. Manajemen perawatan pasien pasca operasi di Klinik Hewan Kayu Manis sudah cukup baik.
