| | |
|--|----------|
| DECLARATION | i |
| DEDICATION | ii |
| ABSTRACT | iii |
| SARI | iv |
| ACKNOWLEDGEMENTS | v |
| TABLE OF CONTENTS | vi |
| LIST OF FIGURES | ix |
| LIST OF TABLES | xii |
| CHAPTER I INTRODUCTION | 1 |
| I.1 Background | 1 |
| I.2 Problem formulation | 1 |
| I.3 Objectives | 2 |
| I.4 Location of study | 2 |
| I.5 Scope of research | 3 |
| I.6 Research outcome | 3 |
| I.7 Previous research | 4 |
| CHAPTER II LITERATURE REVIEW | 5 |
| II.1 Regional geology | 5 |
| II.1.1 Physiography | 5 |
| II.2 Regional geology and tectonic setting | 6 |
| II.3 Stratigraphy | 7 |
| II.4 Potential of Semilir Formation as reservoir rock | 9 |
| II.5 Background theory | 10 |
| II.5.1 Characteristics and physical properties of reservoir rock | 10 |
| II.5.1.1 Porosity | 10 |
| II.5.1.2 Permeability | 12 |
| II.5.1.3 Diagenesis and reservoir quality | 16 |
| II.5.2 Structural geology | 19 |
| II.5.2.1 Fault type | 19 |
| II.5.2.2 Effects of faulting on geologic or stratigraphic units | 21 |

| | | |
|--|---|-----------|
| II.5.2.3 | Determination of fault displacement..... | 21 |
| II.5.3 | Quantitative of fault seal prediction..... | 22 |
| II.5.3.1 | Observation of clay smear | 23 |
| II.5.3.2 | Algorithms for predicting clay smear prediction | 23 |
| CHAPTER III HYPOTHESIS AND RESEARCH METHODS | | 26 |
| III.1 | Hypothesis..... | 26 |
| III.2 | Methodology | 26 |
| III.2.1 | Research data | 27 |
| III.2.1.1 | Field data..... | 27 |
| III.2.1.2 | Laboratory data | 28 |
| III.2.2 | Research material..... | 30 |
| III.3 | Research framework | 31 |
| III.3.1 | Research phase..... | 31 |
| III.3.1.1 | Preparation phase | 31 |
| III.3.1.2 | Field data acquisition phase | 31 |
| III.3.1.3 | Data processing and laboratory analysis phase..... | 31 |
| III.3.1.4 | Data compilation and integration phase | 32 |
| III.3.1.5 | Electoral report phase..... | 32 |
| III.3.2 | Flow chat..... | 32 |
| CHAPTER IV FIELD INVESTIGATION..... | | 35 |
| IV.1 | Outcrop overview..... | 35 |
| IV.2 | Lithofacies and stratigraphic pattern..... | 36 |
| IV.2.1 | Tuff facies | 36 |
| IV.2.2 | Sandstone facies..... | 36 |
| IV.2.3 | Sand intercalated silt facies..... | 36 |
| IV.2.4 | Tuffaceous sandstone facies | 37 |
| IV.2.5 | Siltstone facies | 37 |
| IV.2.6 | Lapillistone facies | 37 |
| IV.3 | Contour map..... | 38 |
| IV.4 | Faults distribution and fault characteristic | 38 |
| IV.5 | Faults map..... | 40 |

| | | |
|---|--|------------|
| IV.5 | Clay smear | 41 |
| CHAPTER V RESULTS AND DISCUSSION | | 42 |
| V.1 | Petrophysical data | 42 |
| V.1.1. | Porosity | 42 |
| V.1.2. | Permeability | 46 |
| V.2 | Petrography data | 49 |
| V.3 | Petrophysical vs petrographical analysis | 51 |
| V.5 | Porosity Vs permeability of reservoir | 54 |
| V.4 | Petrophysic data Vs petrographic data..... | 55 |
| V.5 | Algorithm calculation | 61 |
| V.6 | Visual data | 62 |
| V.7 | Fault sealing | 63 |
| V.6 | Clay minerals | 63 |
| CHAPTER VI CONCLUSION AND RECOMMENDATION | | 66 |
| VI.1 | Conclusion | 66 |
| VI.2 | Recommendation | 67 |
| REFERENCES | | 68 |
| Appendix I: Petrographic analysis | | 71 |
| Appendix II: Petrophysical analysis..... | | 86 |
| Appendix III: Algorithm calculation of SSF, CSP, and SGR | | 105 |
| Appendix IV: X-ray diffraction | | 107 |
