DECLARATION	i
ACKNOWLEDGMENT	ii
ABSTRACT	iii
INTISARI	iv
TABLE OF CONTENTS	v
LIST OF TABLE	ix
LIST OF FIGURE	x
CHAPTER I:INTRODUCTION.....	1
I.1 Background.....	1
I.2 Problem Formulations	3
I.3 Objectives.....	4
I.4 Scope of Research	4
I.4.1 Study Area	4
I.4.2 Scopes of Research Works	6
I.5 Previous Study.....	6
CHAPTER II: LITERLATURE REVIEW	8
II.1 Geological Condition	8
II.2 Hydrogeological Setting	10
II.2.1 Aquifer Definition	13
II.2.2 Groundwater Quality	14
II.3 Theoretical Background	16
II.3.1 Nitrates Contamination.....	16
II.3.2 Source of Nitrates	19
II.3.3 Nutrient - Nitrate	20
II.3.4 Nitrate in Drinking Water.....	20
II.3.5 Fate and Transport Process of Nitrate	21
II.3.6 Impact of Nitrate on Human’s Health and Ecosystems.....	23
II.4 Groundwater Vulnerability	24

II.4.1 Groundwater Vulnerability Concept	24
II.4.2 Basic of Groundwater Vulnerability	25
II.4.3 Groundwater Vulnerability Assessment	27
II.4.4 GOD Method	28
II.5 Groundwater Contaminant Hazard Assesment.....	31
II.5.1 Groundwater Contaminant Hazard.....	31
II.5.2 Groundwater Contaminat Loading	32
II.6 Hypothesis.....	36
CHAPTER III: RESEARCH METHODOLOGY	37
III.1 Research Fund	37
III.2 Material of Research.....	37
III.3 Research Steps	38
III.3.1 Research Preparation.....	38
III.3.2 Field Investigation Stage	39
III.3.3 Laboratory Works	39
III.3.4 Data Processing and Analysis	40
III.3.5 Field Works	40
III.3.6 Result.....	42
III.3.7 Report Writhing	42
CHAPTER IV: DATA PROCESSING AND ANALYSIS	44
IV.1 General Site Characteristic	44
IV.1.1 Land Use	44
IV.1.2 Population Density of Study Area	45
IV.2 Geology of Study Area.....	46
IV.3 Hydrogeology Condition of the Study Area.....	50
IV.3.1 Depth to groundwater	50
IV.3.2 Groundwater Flow	50
IV.3.3 Groundwater Vulnerability	51
CHAPTER V: RESULT AND DISSCUSION.....	55

V.1 Result of Groundwater Vulnerability by GOD Method	55
V.2 Nitrate Concentration in Groundwater	56
V.3 Correlation of Nitrate Concentration and Landuse.....	59
V.4 Groundwater Contaminant Hazard of The Study Area	60
V.4.1 Landuse Map for Groundwater Contamination Loading Assessment	60
V.4.2 Assessment of Groundwater Hazard in the Study Area.....	62
V.4.3 Groundwater Contaminant Hazard map.....	65
CHAPTER VI: CONCLUSION AND RECOMMENDATION	68
VI.1 Conclusion	68
VI.2 Recommendation.....	69
REFERENCE.....	71
APPENDIX-A: DUG WELL MEASUREMENT OF THE STUDY AREA.....	74
APPENDIX-B: DATA POPULATION DENSITY OF YOGYAKARTA.....	76
APPENDIX-C: EXISTING OF BOREHOLE OF YOGYAKARTA CITY FROM FACULTY OF ENGINEERING GADJAH MADA UNIVERSITY	77
APPENDIX-D: DATA ANALYSIS FROM LABORATORY.....	84
APPENDIX-E: FIELD INVESTIGATION.....	88
APPENDIX-F: LANDUSE ACTIVITIES OF THE STUDY AREA	89

LIST OF FIGURE

FigureII.1: Geological Map of Yogyakarta - Sleman Groundwater Basin (modified from MacDonald and Partners (1984), Putra (2003)).....	9
FigureII.2:Conceptual cross section of merapi aquifer system (Hendrayana, 1993).	11
Figure II.3: Hydrogeological fence of merapi aquifer system (Putra, 2003).....	12
Figure II.4: Potential source of groundwater contamination (Zaporozec and Miller, 2000).	20
FigureII.5: GOD system for evaluation of aquifer pollution vulnerability (After Foster and Hirata, 1988).	30
FigureII.6: Conceptual scheme of groundwater pollution risk as a function of contaminant load and degree of aquifer vulnerability (Foster, S. et al., 2002 and Morris & Lawrence, 2003).	32
Figure II.7: Characterization of contaminant load factors, (Foster andHirata, 1988; Chilton et al., 2006).	33
Figure II 8: Characterization of intensity of contaminant (Foster and Hirata, 1988; Chilton et al., 2006).	34
Figure II.9: Characterization of Mode of disposition (Foster and Hirata, 1988; Chilton et al., 2006).	35
Figure II.10: Characterization of Duration of application (Foster and Hirata, 1988; Chilton et al., 2006).	36
Figure III.2: Water sample points of study area.	42
Figure III.3: Flow chart of research methodology.	43 44
FigureIV.1: Landuse map of the study area.....	44
Figure IV.2: Population density of Sub-District in the study areas	45
FigureIV.3 Population density map of the study area.	46
Figure IV.4: Surface lithology map of the study area.	47
Figure IV.5: Cross section of A - A of the study area.	48

Figure IV.6 : Cross section of B - B of the study area.....	49
Figure IV.7: Groundwater flow map in the study area.	50
Figure IV.8: Groundwater occurrence of study area.	52
Figure IV.9: Overlay the lithology of the study area.	53
Figure IV.10: Depth to groundwater table of the study area.	54
Figure V.1: Groundwater vulnerability map of study area.	56
Figure V.2: Nitrate and Chloride concentration ratio in groundwater in the area. .	57
Figure V.3: Boxplot diagram of nitrate concentration in groundwater from various land use categories within the study area.	59
Figure V.4: Nitrate concentration in groundwater and land use within the study area.....	60
Figure V.5: Class of groundwater contaminant loading in land use of the study area.....	62
Figure V.6: Nitrate Concentration in Groundwater Contaminant Hazard map of the study area.	66
Figure V.7: Boxplot diagram of nitrate concentration in groundwater by Groundwater Contaminant Hazard map of the study area.....	67

LIST OF TABLE

TableII.1: General definition of water bearing units based on upon geology (<i>MacDonald & Partners, 1984</i>).	14
TableII.2: Hydrochemical analyses of groundwater from merapi aquifer system (Unit: mg/L except Ec: $\mu\text{S}/\text{cm}$) (<i>MacDonald and Partners,</i> 1984)	15
TableII.3: Groundwater contamination cases in the study area (Unit: mg/L) (<i>Putra,</i> 2007)	15
Table II.4 : Broad classification of aquifer vulnerability (<i>Foster et al., 2002</i>).	25
Table II.5: Interval value of GOD index and corresponding classes (<i>Murat et al.</i> 2003; <i>Abdelmadjid and Omar, 2013</i>).	29
Table IV.1: Population of the Yogyakarta city in the study area (from 2013)	45
Table V.1: Concentration of Nitrate in Groundwater (Unit: mg/L)	58
TableV.2: Matrix of object specific rating used to assign groundwater contamination hazard map combined with GOD map and land-use map	64
TableV.3: Final classification of groundwater vulnerability to landuse	65
