	Pages
COVER .....	i
APPROVAL PAGE .....	ii
DECLARATION.....	iii
PREFACE .....	iv
CONTENTS .....	vii
LIST OF TABLES .....	ix
LIST OF FIGURES .....	x
LIST OF ATTACHMENTS .....	xi
INTISARI .....	xii
ABSTRACT.....	xiii
I. INTRODUCTION.....	1
A. The background of the research.....	1
B. Research problems.....	5
C. Research originality .....	6
D. Research objectives.....	7
E. Research benefits.....	7
II. LITERATURE REVIEW.....	9
A. Literature Study.....	9
1. Immunobiology of Tuberculosis .....	9
a. The bacillus .....	9
b. Susceptibility to tuberculosis .....	10
c. The diagnosis of tuberculosis .....	11
d. Pathogenesis of tuberculosis .....	13
e. The role of macrophages .....	14
1). Phagocytosis of bacteria .....	14
2). Radical formation .....	15
3). Induction of cytokine production .....	16
4). Apoptosis .....	17
5). Evasion of macrophage killing mechanism .....	17
f. Regulation of immune responses by T cell .....	19
g. Regulation of immune response by cytokines .....	21
2. <i>Phyllanthus niruri</i> Linn. ....	28
a. Pharmacology .....	29
b. <i>Phyllanthus niruri</i> as immunomodulatory .....	30
B. Theoretical Framework.....	33
C. Conceptual Framework.....	34
D. Hypothesis.....	34

III.	RESEARCH METHODOLOGY ..	35
A.	Type of study .....	35
B.	Subjects.....	35
C.	Variables .....	36
D.	Operational Definition.....	36
E.	Materials and methods.....	38
1.	Materials .....	38
2.	Reagents .....	38
F.	Flow of Study.....	39
G.	Statistical analysis.....	43
IV.	RESULT AND DISCUSSION.....	44
A.	Results.....	44
B.	Discussion.....	50
V.	CONCLUSION	57
A.	Conclusion .....	57
B.	Burden and limitations .....	57
C.	Suggestions .....	58
	REFERENCES .....	59
	ATTACHMENTS.....	68

## LIST OF TABLES

	Pages
Table 1. Kruskal-Wallis Test Statistics for cell viability .....	45
Table 2. Number of phagocytic cells .....	47
Table 3. ANOVA test for phagocytic cells .....	48
Table 4. Multiplicity of infection .....	48
Table 5. ANOVA test statistics for multiplicity of infection (MOI) .....	48

## LIST OF FIGURES

	Pages
Figure 1	Overview of the immune response in Tuberculosis ..... 26
Figure 2	<i>Phyllanthus niruri</i> Linn. .... 29
Figure 3	Flow of study ..... 39
Figure 4	Percentage of cell viability ..... 45
Figure 5	Nitric oxide regression curve ..... 46
Figure 6	Mean percentage of phagocytic cells ..... 47
Figure 7	Phagocytic index ..... 48
Figure 8	Macrophages stained with Giemsa ..... 49
Figure 9	Activity of <i>P. niruri</i> as antioxidant and in increasing NO production ..... 53

## LIST OF ATTACHMENTS

		Pages
Attachment 1	Patients characteristic .....	68
Attachment 2	Formazan crystal formed using MTT assay .....	68
Attachment 3	Nitric oxide plate .....	69
Attachment 4	<i>Phyllanthus niruri</i> species identification .....	70
Attachment 5	Ethical clearance letter .....	71
Attachment 6	Free radical (DPPH) anti-oxidant assay result from LPPT Laboratory, UGM .....	72
Attachment 7	Letter of research completion from LPPT Laboratory Universitas Gadjah Mada .....	73
Attachment 8	The Normality and Homogeneity of mononuclear cell viability .....	74
Attachment 9	The one-way ANOVA test result of mononuclear cell viability .....	74
Attachment 10	The Normality and Homogeneity of of macrophage's multiplicity of infection .....	74
Attachment 11	The one-way ANOVA test result of of macrophage's multiplicity of infection .....	75
Attachment 12	The Normality and Homogeneity of of macrophage's phagocytosis activity .....	75
Attachment 13	The one-way ANOVA test result of mononuclear cell phagocytosis activity .....	76
