INTISARI

Penelitian ini bertujuan untuk perencanaan penetapan batas administrasi daerah dari tingkat dusun menggunakan Citra Spot-6 dan mempublik batas administrasi dusun kedalam web di Kecamatan Banguntapan. Perencanaan penetapan batas administrasi dusun berdasarkan Permendagri No. 27 Tahun 2006 tentang Penetapan Dan Penegasan Batas Daerah. Perencanaan penetapan batas administrasi dusun menggunakan data citra resolusi tinggi, peta RBI skala 1:25.000 lembar 1408-224, peta lain, dan survei lapangan.

Metode yang digunakan dalam perencanaan penetapan batas administrasi dusun merupakan metode gabungan antara metode partisipatif dan metode kartometris. Proses perencanaan penetapan batas administrasi dusun dilakukan dengan rangkaian: penarikan garis batas diatas peta kerja, survay lapangan, validasi batas administrasi tingkat desa, dan mempublik batas administrasi kedalam web.

Hasil penelitian perencanaan penetapan batas dari tingkat dusun memberikan informasi gambaran wilayah setiap dusun di Kecamatan Banguntapan serta mencegah terjadinya konflik batas wilayah, terciptanya tertib administrasi pemerintahan dan perencanaan tata ruang yang tepat sasaran.

Kata Kunci : Batas Administrasi, Penetapan Dan Penegasan Batas, Citra Resolusi Tinggi

**UTILIZATION OF SPOT-6 IMAGERY TO PLAN THE DETERMINATION
OF VILLAGE ADMINISTRATIVE BOUNDARIES IN THE DISTRICT
BANGUNTAPAN**
