LIST OF TABLES	viii
LIST OF FIGURES	ix
 CHAPTER 1 INTRODUCTION	 1
1.1 Background	1
1.2 Research Problem	5
1.3 Objectives.....	7
1.4 Research Originality	7
1.5 Research Benefits	9
 CHAPTER 2 LITERATURE REVIEW	 9
2.1 Lahars in Kelud Volcano	9
2.2 Mitigation towards Lahars and Flash Flood.....	12
2.3 Retarding Basin as Structural Mitigation Measure	17
2.4 OpenLISEM Hydrological Modeling	17
2.5 Land Use Planning as Non-structural Mitigation Measure	19
 CHAPTER 3 MATERIAL AND METHOD	 21
3.1 Research Material and Tools	21
3.2 Research Operational Framework	24
3.3 Rainfall-Runoff Modeling by openLISEM	24
3.3.1 Catchment Characteristic	25
3.3.2 Land Cover and Vegetation.....	26
3.3.3 Infiltration and Surface Characteristic	27
3.3.4 Overland and Channel Flow	27
3.3.5 Rainfall Intensity Analysis	28
3.3.6 Generating DEM.....	29
3.3.7 Land Cover Classification	29
3.3.8 Land Cover Map Generalization	30
3.4 Fieldwork Data Acquisition	30
3.4.1 Soil Properties Measurements and Sampling Procedure	30
3.4.2 Flow Velocity Measurements.....	33
3.5 Model Calibration and Validation	34
3.6 Retarding Basin Modeling Approach	35
3.6.1 Determining Retarding Basin Location	35
3.6.2 Designing Retarding Basin.....	37

3.6.3 Modeling Scenario	40
3.7 Evaluation on Spatial Plan in Regional Regulation with the Existing Land Use	40
3.8 Analysis Method.....	41
CHAPTER 4 STUDY AREA	42
4.1 Geographic Location	42
4.2 Geology and Geomorphology	44
4.3 Soil Properties and Land Cover.....	46
4.4 Catchment and Channel Characteristic	53
4.5 Climate Characteristic.....	57
CHAPTER 5 RESULT AND DISCUSSION	60
5.1 Rainfall-Runoff Generation In Bladak Catchment	60
5.1.1 Model Data Input	60
5.1.2 Rainfall Data.....	60
5.1.3 Physical Properties as Input Parameters	60
5.1.4 Rainfall-Runoff Modeling.....	62
5.1.5 Concluding Remarks.....	64
5.2 Retarding Basin Modeling	65
5.2.1 Retarding Basin Site Selection	65
5.2.2 The Effectiveness of Retarding Basin in Bladak Catchment	68
5.2.3 Concluding Remarks.....	69
5.3 Spatial Plan And Policy Aspect	70
5.3.1 Evaluation on Deviating of Existing Land Cover with the Allocated Land Cover Based on Regional Regulation	71
5.3.2 Land Use Aspect to Retarding Basin Location	75
5.3.3 Concluding Remarks.....	76
CHAPTER 6 CONCLUSION	77
6.1 Conclusion from the perspective of research objectives	77
6.2 General Conclusion	78
6.3 Limitation.....	79
6.4 Recommendation.....	80
References	81
Appendices	85

LIST OF TABLES

1-1	Selection of notable eruption of volcanoes in Indonesia involving 1000 or more fatalities	1
1-2	Front velocity of lahar flow in Bladak and Putih river following the 1990 eruption	3
1-3	Structural and Non-structural Measures	4
1-4	Research Questions and Objectives.....	7
2-1	Historical Events of lahars in Kelud	11
2-2	Open Debris Flow Control Structures	14
2-3	Closed Debris Flow Control Structures	14
3-1	Research Materials and Tools	22
3-2	Input maps in LISEM	25
3-3	Mapping unit for soil samples	31
3-4	Flow velocity measurement	35
3-5	Parameter required for suitable retarding basin location	37
3-6	Qualification of parameters for retarding basin design	39
4-1	Village Areas in Bladak Regency that are passed by lahar pathway.....	43
4-2	Geological unit in Bladak catchment.....	45
4-3	Slope classification in Bladak catchment	46
4-4	Soil physical characteristic.....	48
4-5	Areas of each land cover type in Nglegok and Ponggok	51
4-6	Land cover and vegetation coverage properties	52
4-7	Initial soil moisture and surface roughness for each land cover type.....	52
4-8	Sabo dam locations	57
5-1	The result of retarding basin scenario on Bladak catchment	68
5-2	Deviating Area of Settlement and Crop Land in Bladak Catchment	72
5-3	Settlements and Crop Land in Bladak Catchment that overtop the areas allocated for other purposes	74

LIST OF FIGURES

1-1	Concept of check dams and retention basin design	16
3-1	Research conceptual framework	21
3-2	Research methodology.....	23
3-3	Bladak DEM Map.....	29
3-4	Map of soil sample locations and flow velocity measurement	31
3-5	Soil sampling for particle size analysis using soil auger	32
3-6	The appearance of software Soil Water Characteristics	33
3-7	Measuring streamflow with float	34
4-1	Study Area map	42
4-2	Villages in Bladak Regency that are passed by lahar pathway	43
4-3	Sand Mining and Gambar Plantation in Nglegok Sub-District.....	44
4-4	Upstream Bladak in Kelud volcanic peak.....	45
4-5	Geological unit map of Bladak catchment	46
4-6	Soil texture map of Bladak catchment	47
4-7	Land cover map of Bladak catchment	49
4-8	Example of land cover in Bladak catchment	50
4-9	Land cover in Bladak catchment that are passed by lahar pathway	51
4-10	Road map of Bladak catchment.....	52
4-11	Bladak channel characteristic	55
4-12	Variation in material size and seepage point in upper Bladak	56
4-13	Sabo dam locations in Bladak catchment	57
4-14	Average Annual Rainfall in Bladak catchment	58
4-15	Monthly rainfall of Slemanan and Candisewu station in 2010	59
5-1	Input maps of the hydrological model	62
5-2	Modeling result.....	63
5-3	Qualification map for retarding basin location	65
5-4	Proposed Retarding Basin location in Bladak catchment	67
5-5	Hydrograph due to retarding basin scenario in Bladak catchment	68
5-6	Spatial plan map of Blitar Regency confined by Bladak catchment boundary.....	70
5-7	Map of Deviation Analysis Result for Settlement in Bladak catchment	73
5-8	Map of Deviation Analysis Result for Crop Land in Bladak catchment	73
5-9	Intensive agricultural activity in the areas around river and sloping area in Bladak catchment	74
5-10	Location and suitable areas for retarding basins	75
