

## TABLE OF CONTENTS

DECLARATION .....	i
ACKNOWLEDGEMENT .....	ii
ABSTRACT .....	iii
LIST OF TABLES .....	vii
LIST OF FIGURES.....	viii
CHAPTER 1 INTRODUCTION .....	1
1.1. Background .....	1
1.2. Problem statement.....	2
1.2.1. Existing drainage system .....	2
1.3. Objective of study .....	3
1.4. Scope of works.....	3
CHAPTER 2 LITERATURE REVIEW .....	4
2.1. Pervious study .....	4
2.2. Tidal flood.....	4
2.3. Urbanization effects .....	5
2.4. HEC-RAS tool .....	5
2.5. GIS .....	6
2.6. AProb_4.1E.....	6
CHAPTER 3 THEORETICAL CONSIDERATION .....	7
3.1. Rainfall runoff simulation.....	7
3.1.1. Catchment rainfall .....	7
3.1.2. Frequency analysis .....	9
3.1.3. Tests on suitability of empirical distribution functions .....	11
3.1.4. Precipitation.....	12
3.1.5. Rational method.....	13
3.2. HEC-RAS hydraulic analysis .....	15

3.2.1.	Unsteady flow equation .....	15
3.2.2.	Saint-Venant equation .....	15
3.2.3.	Manning coefficient.....	16
3.2.4.	Limitation of velocity .....	16
3.2.5.	Freeboard .....	17
<b>CHAPTER 4 RESEARCH METHODOLOGY .....</b>		<b>19</b>
4.1.	Study area.....	19
4.2.	Research methodology .....	20
4.3.	Hydraulic flood routing simulation scenario .....	22
4.4.	Hydraulic routing model processing .....	23
4.4.1.	Start new project.....	23
4.4.2.	Entering geometric data.....	24
4.4.3.	Entering flow data and boundary condition .....	29
4.4.4.	Performing the Hydraulic Calculation.....	31
4.4.5.	Viewing and printing the result .....	32
<b>CHAPTER 5 ANALISIS AND DISCUSSION .....</b>		<b>33</b>
5.1.	Hydrology analysis .....	33
5.1.1.	Rainfall data.....	33
5.1.2.	Frequency analysis .....	35
5.1.3.	Uniform lateral inflow .....	38
5.2.	Hydraulic setup .....	42
5.2.1.	River geometry of Sringin river.....	42
5.2.2.	Boundary condition .....	44
5.2.3.	Downstream boundary condition.....	45
5.2.4.	Upstream boundary condition .....	46
5.2.5.	Running unsteady flow simulation on HEC-RAS version 5.3.0 ..	46
5.2.6.	Result simulation of existing condition .....	49

5.2.7.	Design geometry .....	52
5.3.	Evaluation of design condition .....	59
5.3.1.	Case of max peak runoff and max high tide occurred at the same time .....	59
5.4.	Discussion current study and the existing design .....	62
CHAPTER 6 CONCLUSION AND RECOMMENDATION .....		66
6.1.	Conclusion .....	66
6.2.	Recommendation .....	67
REFERENCES.....		68
APPENDIX .....		71
