

## Table of Contents

HALAMAN PENGESAHAN .....	iii
PERNYATAAN .....	iv
ACKNOWLEDGEMENT .....	v
LIST OF TABLES .....	xi
LIST OF FIGURES.....	xii
ABSTRACT.....	xiv
INTRODUCTION .....	1
1.1 Background .....	1
1.2 Problem statement .....	2
1.3 Scope of the problem.....	3
1.4 Research objective.....	3
1.5 Authenticity of the research .....	3
1.6 Benefit of research .....	3
1.7 Research organization .....	4
CHAPTER II.....	5
LITERATURE REVIEW .....	5
2.1 Introduction .....	5
2.2 Bluetooth related work .....	5
2.3 Wi-Fi direct related work .....	6
2.3 Summary of related work.....	8
2.4 Comparabilitybetween Computer and smartphone .....	10
CHAPTER III .....	11
THEORY .....	11
3.1 Bluetooth Technologies.....	11
3.1.1 Introduction.....	11
3.1.2 Bluetooth protocol stack architecture .....	11
3.1.3 Bluetooth Networks .....	14
3.1.4 Connection state.....	15
3.1.5 Bluetooth network configuration procedure .....	16

3.2	Wi-Fi Direct Technology .....	17
3.2.1	Introduction .....	17
3.2.2	Wi-Fi direct configuration procedure .....	18
3.2.3	Wi-Fi Direct architecture .....	21
3.3	Comparison between Bluetooth 4.0 and Wi-Fi Direct .....	22
3.4	P2P communication .....	23
CHAPTER IV .....		24
SYSTEM ANALYSIS AND SYSTEM DESIGN .....		24
4.1	Research Methodology .....	24
4.1.1	Library studies .....	24
4.1.3	System requirements analysis .....	25
3.1.4	System design model .....	25
4.1.5	Implementation .....	25
4.1.6	Testing and evaluation .....	25
4.2	Proposed System framework .....	25
4.2.1	Proposed framework for Master/P2P Go application .....	28
4.2.2	Proposed framework for Slave - client application .....	30
4.2.3	Proposed framework for web based application .....	31
4.4	Requirement analysis of proposed systems .....	33
4.4.1	Function requirements .....	33
4.4.2	Non-functional requirements .....	34
4.4.3	Hardware requirements .....	34
4.4.4	Software tools .....	34
4.5	System Design .....	35
4.5.1	User case diagram of software system .....	35
4.5.2	Activity diagrams for intercommunication with desktop application .....	37
4.5.3	Activity diagrams for intercommunication with web based app .....	41
4.5.4	Sequence diagram of software system .....	43
4.5.5	User interface (UI) design of software application .....	45
4.6	Data Modeling .....	47
4.6.1	Diagram of Database Schema .....	47

4.6.2	Data Scenario .....	51
CHAP V	.....	52
IMPLEMENTATION	.....	52
5.1	Description of Implementation.....	52
5.2	Network configuration .....	52
5.2.1	Bluetooth Personal Area Network Connection Setup.....	52
5.2.2	Wi-Fi direct connection set up.....	54
5.3	Implementation of P2P Software Application .....	54
5.4	Implementation of web base application.....	63
5.4.1	Implementation of login page .....	63
5.4.2	Implementation of record page .....	64
5.4.3	Implementation of Chat Menu .....	66
5.4.4	Implementation of User management page .....	66
5.4.5	Implementation of password management page.....	69
5.4.6	Implementation of Logout menu .....	71
CHAP VI	.....	72
RESULT AND DISCUSSION	.....	72
6.1	Connectivity testing.....	72
6.1.1	Connectivity test for Bluetooth connection .....	72
6.1.2	Connectivity test for Wi-Fi Direct connection.....	73
6.1.3	Result from network connectivity testing .....	73
6.2	Functional testing of P2P communication system .....	74
6.2.1	Functional testing for Master P2P Go – Slave / Client application .....	74
6.2.3	Functional testing for web based application.....	77
6.3	Usability testing.....	82
6.4	Portability testing .....	85
6.5	Discussion of results.....	86
6.5.1	Functional Testing result.....	86
6.5.2	Portability testing result .....	87
6.5.3	Usability testing result .....	87
CHAPTER VII	.....	88

CONCLUSIONS AND RECOMMENDATION .....	88
7.1 Conclusion.....	88
7.2 Recommendation.....	89
REFERENCE.....	90
APPENDIX I .....	94
APPENDIX II .....	95
APPENDIX III.....	108
APPENDIX IV.....	121
