Rawat inap merupakan salah satu fasilitas kesehatan yang tersedia di Klinik Hewan Kayu Manis Yogyakarta. Tujuan penulisan tugas akhir ini adalah mengetahui manajemen perawatan pasien anjing rawat inap di Klinik Hewan Kayu Manis Yogyakarta. Pengambilan data dilakukan dengan observasi pencatatan data pasien melalui buku pasien dan ambulatoir, praktik langsung, dan dokumentasi selama periode 31 Oktober – 11 November 2016. Selama periode Praktik Kerja Lapangan (PKL) diperoleh data pasien rawat inap anjing di Klinik Hewan Kayu Manis Yogyakarta sebanyak 8 pasien. Manajemen perawatan pasien anjing rawat inap meliputi pembersihan kandang dilakukan dua kali sehari, penggantian air minum dua kali sehari, dan pemberian pakan dua kali sehari. Penempatan pasien rawat inap beda spesies dalam satu ruangan. Pemberian obat dilakukan sesuai diagnosis dan jadwal yang telah dibuat oleh dokter hewan berwenang. Berdasarkan hasil dan pembahasan dapat disimpulkan bahwa manajemen perawatan pasien anjing rawat inap di Klinik Hewan Kayu Manis Yogyakarta cukup baik namun perlu ditingkatkan mengenai penempatan pasien berbeda spesies (anjing dan kucing) dalam satu ruangan dan pembersihan kandang belum menggunakan desinfektan.

Kata kunci: perawatan, rawat inap, anjing, Kayu Manis.

Hospitalization was one of the health facilities available at the Klinik Hewan Kayu Manis. The purpose of this paper is to study the management care of hospitalization dog patients at the Klinik Hewan Kayu Manis Yogyakarta. The data used for this paper were collected by observation recording data patient on medical record, direct practice, and documentation during the period October 31 – November 11, 2016. During the period of intership obtained data of hospitalization dog patients in the Klinik Kayu Manis Yogyakarta of 8 patients. The management care of hospitalization dog patient including the cages twice a day, replacement of drinking water twice a day, and feeding twice a day. The hospitalization patients of different species were placed in one room. Medication given for patients according to the diagnosis and schedule made by the authorized veterinary. Based on the results and discussion, it could be concluded that the management care of hospitalization dog patients in Klinik Hewan Kayu Manis Yogyakarta was quite good but needs to be improved regarding the placement of patients from different species (dogs and cats) in one room and cleaning the cage were not using disinfectant.
