

TABLE OF CONTENTS

DECLARATION	i
DEDICATION	ii
ACKNOWLEDGEMENT	iii
TABLE OF CONTENTS	iv
LIST OF TABLES	vi
LIST OF FIGURES	viii
ABSTRACT	ix
CHAPTER I	1
1.1 Background	1
1.2 Design Problem	3
1.3 Design Purpose	3
1.4 Design Limitations	4
1.5 Design Benefits	4
1.6 Design Authenticity	4
CHAPTER II	6
2.1 Terminology	6
2.2 Establishment, Operation, and Management of Airports in Indonesia	7
2.3 Establishment, Operation, and Management of Rail Infrastructure in Indonesia	8
2.4 High Speed Rail in Indonesia	8
2.5 Station Classification	8
2.6 Station Layout	9
2.7 Pedestrian Flow	9
CHAPTER III	12
3.1 Criteria Analysis of Station Classification	12
3.2 Passenger Service Standards	12
3.3 Spatial Requirements	12
3.3.1 General Requirements	12
3.3.2 Specific Requirements	13
3.4 Wayfinding System	31
3.5 Modal Interchange	42
3.6 Optimum Design	42
CHAPTER IV	46
4.1 Design Flow Chart	46
4.2 Technical Data	49

4.2.1	Masterplan of Kertajati International Airport	49
4.2.2	Passenger and Traffic Forecast at Kertajati International Airport	49
4.2.3	Information of Modal Interchange at Kertajati International Airport	49
4.3	Design Tools	50
4.4	Design Process	50
CHAPTER V		53
5.1	Location Overview	53
5.2	Station Classification	54
5.2.1	Operating Facilities	54
5.2.2	Number of Tracks	55
5.2.3	Supporting Facilities	56
5.2.4	Traffic Facilities	59
5.2.5	Daily Passenger Volume	60
5.2.6	Daily Cargo Volume	65
5.3	Identification of station facilities and spatial requirements	66
5.4	Passenger Flow Design	74
5.5	Station Capacity Design	80
5.5.1	General Requirements	80
5.5.2	Public Area Requirements	81
5.5.3	Non-public area requirements	91
5.5.4	Platform requirements	93
5.6	Design of Station Layout	94
5.7	Design of Wayfinding Signage	98
5.8	Optimum Design	102
CHAPTER VI		116
6.1	Conclusion	116
6.2	Recommendations	117
