

Intisari

Penelitian ini dilakukan dengan tujuan untuk mengetahui efektivitas serta efisiensi penyaluran Raskin di Kecamatan Pucakwangi Kabupaten Pati. Efektivitas Penyaluran Raskin diukur dengan 6 Indikator ketepatan atau 6T. 6T terdiri dari tepat sasaran, tepat harga, tepat jumlah, tepat waktu, tepat kualitas, dan tepat administrasi. Efisiensi penyaluran Raskin diukur berdasarkan biaya tambahan tebus Raskin dan jumlah Raskin yang diterima Rumah Tangga Sasaran. Metode analisis deskriptif digunakan dalam penelitian ini, dengan melakukan wawancara kepada 60 responden yang dipilih menggunakan metode *proportional random sampling*. Digunakan uji rerata (*one sample t test*) terhadap data yang diperoleh untuk mengetahui efektivitas penyaluran Raskin serta dihitung biaya tambahan untuk menebus Raskin dan jumlah Raskin yang diperoleh Rumah Tangga Sasaran. Hasil dari penelitian menunjukkan bahwa penyaluran Raskin di Kecamatan Pucakwangi Kabupaten Pati belum efektif, hanya 2 indikator ketepatan yang dapat terpenuhi yaitu tepat sasaran dan tepat waktu. 4 indikator lainnya yaitu tepat harga, tepat jumlah, tepat kualitas, dan tepat administrasi belum dapat terpenuhi. Penyaluran Raskin di Kecamatan Pucakwangi Kabupaten Pati belum efisien, rata-rata Rumah Tangga Sasaran Penerima Manfaat Raskin mengeluarkan biaya tambahan untuk menebus Raskin sebesar Rp. 1.913,00 per kilogram dan hanya mendapat jatah Raskin sebesar 4,95 kg/bulan.

Kata kunci: Rumah Tangga Sasaran, efektifitas, efisiensi, Raskin

Abstract

This research was conducted to determine the effectiveness and efficiency of distribution of Raskin in District Pucakwangi Pati regency. Raskin Distribution Effectiveness was measured by six indicators of accuracy or 6T. 6T consists of the right target, the right price, the right quantity, right time, right quality and right administration. Efficiency of Raskin distribution is measured by the additional costs to redeemed Raskin and the amount Raskin received by Household Targets. This research uses descriptive analysis method by conducting interviews with 60 respondents who were selected with proportional random sampling method. Mean test (one sample t test) of data obtained to examine the effectiveness of the distribution of Raskin and calculated additional costs to redeem Raskin and the amount Raskin received by Household Targets. The results of this research is distribution of Raskin in District Pucakwangi Pati regency is not effective since of meets only two indicators of accuracy that is right on target and on time. 4 other indicators, the right price, the right quantity, quality, and appropriate administration can not be fulfilled. Distribution of Raskin in District Pucakwangi Pati Regency is not efficient, the average Target Households Raskin Beneficiaries incur additional costs to redeem Raskin Rp. 1913.00 / kilogram and only gets Raskin 4.95 kg / month.
