| CONTENTS..... | vii |
| LIST OF TABLES | xii |
| LIST OF FIGURES | xiv |
| LIST OF ABBREVIATIONS | xix |
| CHAPTER I: INTRODUCTION | 1 |
| 1.1. Background | 1 |
| 1.2. Problem Formulation | 2 |
| 1.3. Objectives of the Study | 2 |
| 1.4. Research Outcome | 3 |
| 1.5. Scope of Research..... | 3 |
| 1.5.1. The Study Area | 3 |
| 1.5.2. Scope of Work | 3 |
| 1.5.3. Research Limitation..... | 4 |
| 1.6. Previous Studies..... | 4 |
| 1.7. Organization of the Thesis | 8 |
| CHAPTER II: LITERATURE REVIEW..... | 10 |
| 2.1. Regional Geology of Western Java..... | 10 |
| 2.1.1. Regional Geological Setting..... | 10 |

| | |
|---|-----------|
| 2.1.2. Physiography of West Java..... | 12 |
| 2.1.3. Stratigraphy..... | 14 |
| 2.1.4. Quaternary Volcanism | 16 |
| 2.2. Style of Gold Deposits in West Java..... | 17 |
| 2.2.1. Mineralization in Bayah Dome/Mountains..... | 18 |
| 2.2.2. Mineralization in Southern Mountains Range | 22 |
| CHAPTER III: THEORETICAL BACKGROUND | 29 |
| 3.1. Gold Deposits..... | 29 |
| 3.1.1. Hydrothermal Gold Deposit..... | 29 |
| 3.1.2. Porphyry Cu-Au Mineralization | 30 |
| 3.1.3. Epithermal Gold..... | 32 |
| 3.1.3.1. Terminology..... | 32 |
| 3.1.3.2. Classification of Epithermal Deposit..... | 33 |
| 3.1.3.3. Base Metal Veins | 38 |
| 3.1.4. Skarn Deposit..... | 39 |
| 3.2. Remote Sensing (RS) | 41 |
| 3.2.1. Landsat Images | 41 |
| 3.2.2. ASTER GDEM..... | 43 |
| 3.3. Software Defoliant Method..... | 43 |
| 3.4. Geographic Information System (GIS)..... | 45 |
| 3.4.1. Mineral Potential Mapping using GIS | 45 |
| 3.4.2. GIS Modeling Techniques for Producing Mineral Potential Maps | 47 |
| 3.5. Weight of Evidence Method | 48 |
| 3.5.1. Test Conditional Independence | 51 |
| 1. Pairwise test of Conditional Independence..... | 52 |

| | |
|---|-----------|
| 3.6. Application of Weight of Evidence in Mineral Potential Mapping | 55 |
| 3.7. Extraction of Evidences Maps | 55 |
| 3.7.1. Lithology Map | 55 |
| 3.7.2. Geological Structure Map | 56 |
| 3.7.3. Hydrothermal Alteration Map | 56 |
| 3.8. Hypothesis..... | 57 |
| CHAPTER IV: RESEARCH METHODOLOGY | 58 |
| 4.1. Variable Data and Materials..... | 58 |
| 4.2. Software | 58 |
| 4.3. Research Methodology..... | 58 |
| 4.3.1. Research Preparation | 58 |
| 4.3.2. Spatial Data Processing and Analysis..... | 59 |
| 4.3.3. Predictive Modeling..... | 60 |
| 4.3.4. Model Validation | 61 |
| CHAPTER V: SPATIAL DATASETS AND EVIDENCE MAPS | 64 |
| 5.1. Mineral Deposit Database | 64 |
| 5.2. Lithology | 65 |
| 5.3. Geological Structure..... | 68 |
| 5.4. Hydrothermal Alteration | 73 |
| 5.4.1. Clay Alteration..... | 73 |
| 5.4.2. Limonitic Alteration | 74 |
| 5.4.3. Accuracy Assessment | 76 |
| CHAPTER VI: ANALYSIS AND RESULTS | 80 |
| 6.1. Evidence Maps | 80 |
| 6.2. Analysis | 81 |

| | |
|--|------------|
| 6.2.1. Spatial Association of Au Deposit with Each Evidence Maps | 81 |
| 6.2.1.1. Calculating Weights of Evidence of NE-SW Trending | |
| Lineaments | 82 |
| 6.2.1.2. Calculating Weights of Evidence of NW-SE Trending | |
| Lineaments | 84 |
| 6.2.1.3. Calculating Weights of Evidence of Host rocks | 86 |
| 6.2.1.4. Calculating Weights of Evidence of Heat source | 88 |
| 6.2.1.5. Calculating Weights of evidence of Clay alteration | 90 |
| 6.2.1.6. Calculating Weights of evidence of Limonitic | |
| Alteration | 92 |
| 6.2.2. Test of Conditional Independence | 94 |
| 6.3. Results | 96 |
| 6.3.1. Probabilistic mapping of Au Minerals Potential | 96 |
| 6.3.2. Validating of Predictive Maps and Determining best predictive | |
| map..... | 96 |
| 6.3.3. Overall Test..... | 97 |
| CHAPTER VII: DISCUSSION | 102 |
| 7.1. Au Potential Map | 102 |
| 1. Prospective Target 1:..... | 102 |
| 2. Prospective Target 2:..... | 103 |
| 3. Prospective Target 3:..... | 104 |
| 4. Prospective Target 4, 5, and 6..... | 104 |
| 7.1.2. Weight of Evidence Approach..... | 112 |
| CHAPTER VIII: CONCLUSIONS AND RECOMENDATION | 114 |
| 8.1. Conclusions..... | 114 |
| 8.2. Recommendation | 116 |

| | |
|--|------------|
| REFERENCES | 117 |
| APPENDICES | 125 |
| A.GLOSSARY | 126 |
| B. Useful ArcGIS operations, tools and tips | 127 |
| C. Statistics of Landsat TM data | 128 |
| E. Example for calculation of weight and contrast | 130 |
| F. Example for calculation of Chi-square values | 134 |
| G.Example for calculation of posterior probability map | 134 |

LISTS OF TABLES

| | | |
|-------------|--|----|
| Table 2.1: | History of the Bogor Basin simplified | 15 |
| Table 2. 2: | Table of Summary mineralization in West Java..... | 25 |
| Table 3.1: | Characteristics of epithermal systems | 33 |
| Table 3.2: | Summary of relationships between sulfidation state of Ore- Forming Environment, related Igneous Rock Compositions, and Tectonic Setting..... | 35 |
| Table 3.3: | Characteristic of epithermal deposit types | 36 |
| Table 3. 4: | Characteristics of Landsat 4-5 TM and 7 ETM..... | 42 |
| Table 3.5: | The models exist for mapping mineral potential..... | 48 |
| Table 3. 6: | Contingency table for pairwise testing conditional independence based on pixels that contain a mineral deposit. | 54 |
| Table 4.1: | Research Schedule..... | 63 |
| Table 5. 1: | Result of Rose Diagram..... | 70 |
| Table 6.1: | Variation of weights and Contrasts for cumulative distances from NE-SW trending lineaments with respect to gold deposit..... | 83 |
| Table 6.2 : | Variation of weights and Contrasts for cumulative distances from NW-SE trending lineaments with respect to gold deposit..... | 85 |
| Table 6.3: | Variation of weights and Contrasts for cumulative distances from host rocks with respect to gold deposit | 87 |
| Table 6.4 : | Variation of weights and Contrasts for cumulative distances from heat sources with respect to gold deposit. | 89 |
| Table 6.5: | Variation of weights and Contrasts for cumulative distances from clay alteration with respect to gold deposit..... | 91 |
| Table 6.6 : | Variation of weights and Contrasts for cumulative distances from limonitic alteration with respect to gold deposit..... | 93 |

| | | |
|-------------|--|----|
| Table 6.7: | Chi-square values (χ^2) for testing conditional independence between host rocks (B1) and heat sources (B2) evidence map with respect to the Au occurrences..... | 95 |
| Table 6.8: | Calculated (χ^2) values for testing conditional independence between all pairs of binary maps with respect to gold occurrences..... | 95 |
| Table 6.9 : | Summarized of overall test conditional independence in posterio probability map shown in figure 6.15..... | 98 |
| Table 6.10: | An appropriated the evidence maps base on conditionally independent and statistically significant contrasts for predict the Au occurrences in research area | 99 |
| Table 6.11: | Inventory of Au occurrences in zones of different posterior based on figure 6.14 and 6.15..... | 99 |

LIST OF FIGURES

| | | |
|--------------|--|----|
| Figure 1.1: | The locality of research area in West Java, Indonesia | 3 |
| Figure 2.1: | Tectonic setting of Java Island, Indonesia | 11 |
| Figure 2.2 : | Major geological structure of Java Island | 12 |
| Figure 2.3 : | Physiographic map of West Java | 13 |
| Figure 2.4: | Quaternary volcanoes in Java, with volcano-type terminology follow Tatsumi and Eggins (1995). Note the presence of several segments of volcanic configuration | 17 |
| Figure 2.5: | Location of gold deposit in West Java | 18 |
| Figure 2.6: | Geological map showing the location of the Cirotan Au–Sn–W deposit, as well as other epithermal Au deposits in the region. Insert shows the location of major epithermal gold deposits of Indonesia within the plate-tectonic setting of the region..... | 19 |
| Figure 2.7: | Geology and alteration map of the Cikidang vein, Western Java, Indonesia (Modified from ANTAM, 1994) | 20 |
| Figure 3.1: | Schematic diagram of porphyry, epithermal and skarn deposits (Kirkham and Sinclair, 199)..... | 30 |
| Figure 3.2: | Hydrothermal alteration zones of porphyry Cu-Au deposits | 31 |
| Figure 3.3: | Schematic cross section through an intrusive centered hydrothermal system outlining the environments of porphyry, high-sulfidation and low-sulfidation systems..... | 35 |
| Figure 3.4: | Stages in the development of skarn deposits | 40 |
| Figure 3.5: | Typical reflectance spectra of vegetation, iron oxides and clays | 44 |
| Figure 3.6: | Venn diagram of schematic spatial overlap relationships between binary predictor pattern and binary deposit pattern. | 49 |
| Figure 3.7: | Venn diagram to illustrate the concept of conditional independence. | 53 |

| | | |
|---------------|--|----|
| Figure 4.1: | Flow Chat of Methodology in this research | 62 |
| Figure 5.1 : | Distribution of Au occurrences in study area (Physiography from Van Bemmelen, 1949 and Mineral deposits are modified from Setijadji, 2014, Unpublished data). | 64 |
| Figure 5.2: | Lithology map of the study area | 65 |
| Figure 5.3: | Tertiary- Pleistocene host rock | 67 |
| Figure 5.4: | Tertiary intrusive rock | 67 |
| Figure 5.5: | Four shaded relief images derived from DEM with different illumination directions (sun azimuth) of ,0°, 45°, 90°, and 315°, with a solar elevation of 45°. | 68 |
| Figure 5.6: | The Combined shaded relief DEM image created by combining several shaded relief images with different illumination..... | 69 |
| Figure 5.7: | Lineaments map, interpreted from shaded relief DEM image | 69 |
| Figure 5.8: | Rose diagram of lineament..... | 70 |
| Figure 5.9: | a) Lineaments derived from shaded relief of Arinem districtDEM, b) Regional geological map of the Arinem district, West Java (modified after Alzwar et al., 1992)..... | 72 |
| Figure 5.10: | a) Lineaments in Cibaliung derived from shaded relief DEM, b) Simplified geological map of Cibaliung area..... | 72 |
| Figure 5.11: | a) Lineaments derived from shaded relief DEM, b) Geological map of Cupunagara, Subang District, West Java..... | 73 |
| Figure 5.12 : | Clay alteration map using the software defoliant technique | 75 |
| Figure 5.13: | Limonitic alteration map using the software defoliant technique..... | 76 |
| Figure 5.14: | The Normalized Difference Vegetation Index (NDVI) map, derived from Landsat 5 TM data | 77 |
| Figure 5.15: | a) Clay alteration from Landsat 5 TM, b) Alteration zone of Cupunagara, Subang, West Java , c) Alteration zone of Cihurip, Garut Regency..... | 78 |

| | | |
|--------------|---|----|
| Figure 6.1: | Evidences maps: a) Host rock, b) Heat sources, c) NE-SE trending lineaments, d) NW-SE trending lineaments, e) Clay alteration, and f) Limonitic alteration..... | 80 |
| Figure 6. 2: | Buffer distance s to the NE-SW lineaments | 82 |
| Figure 6.3: | Graph showing the studentized contrast, C and percent of Au occurrences related with buffer at distance for NE-SW trending lineaments. | 83 |
| Figure 6.4: | Binary predictor pattern of NE-SW trending lineaments with 2000 m buffer zones. | 84 |
| Figure 6.5: | Graph showing the studentized contrast, C and percent of Au occurrences related with buffer at distance for NW-SE trending lineaments. | 85 |
| Figure 6.6: | Binary predictor pattern of NW-SE trending lineaments with 1000 m buffer zones. | 86 |
| Figure 6.7: | Graph showing the studentized contrast, C and percent of Au occurrences related with buffer at distance for host rocks. | 87 |
| Figure 6.8: | Binary predictor pattern of host rocks. | 88 |
| Figure 6.9: | Graph showing the studentized contrast, C and percent of Au occurrences related with buffer at distance for heat sources. | 89 |
| Figure 6.10: | Binary predictor pattern of Heat sources with 1000 m buffer zones. | 90 |
| Figure 6.11: | Graph showing the studentized contrast, C and percent of Au occurrences related with buffer at distance for Clay alteration. | 91 |
| Figure 6.12: | Binary predictor pattern of clay alteration with 50 m buffer zones. | 92 |
| Figure 6.13: | Graph showing the studentized contrast, C and percent of Au occurrences related with buffer at distance for Limonitic alteration. | 93 |
| Figure 6.14: | Binary predictor pattern of limonitic alteration with 150 m buffer zones | 94 |

| | | |
|--------------|---|-----|
| Figure 6.15: | Posterior probability map of Au in research area, derived from all predictor patterns present in table 6.10..... | 100 |
| Figure 6.16: | Posterior probability map of Au in research area, resulting from exclusion of clay and limonitic alteration binary predictor patterns..... | 101 |
| Figure 7.1: | Percentage of Potential class | 104 |
| Figure 7.2: | Predictive map of gold in West Java and generate prospective target area for Au..... | 105 |
| Figure 7.3: | Gold potential target areas 1: A) Mineral potential map overlain by Au occurrences as training and validation data, B) Mineral potential map superimposed on shaded of topography, overlain by lineaments and Au occurrences..... | 106 |
| Figure 7.4: | Gold potential target areas 2 ; (A) Mineral potential map overlain by Au occurrences as training and validation data ; (B) Mineral potential map superimposed on shaded of topography, overlain by lineaments and Au occurrences..... | 107 |
| Figure 7.5: | Gold potential target areas 3: A) Mineral potential map overlain by Au occurrences as training and validation data: B) Mineral potential map superimposed on shaded of topography, overlain by lineaments and Au occurrences..... | 108 |
| Figure 7.6: | Gold potential target areas 4: A) Mineral potential map overlain by Au occurrences as training and validation data: B) Mineral potential map superimposed on shaded of topography, overlain by lineaments and Au occurrences..... | 109 |
| Figure 7.7: | Gold potential target areas 5: A) Mineral potential map overlain by Au occurrences as training and validation data, B) Mineral potential map superimposed on shaded of topography, overlain by lineaments and Au occurrences..... | 110 |
| Figure 7.8: | Gold potential target areas 6: A) Mineral potential map overlain by Au occurrences as training and validation data, | |

| | | |
|--------------|---|-----|
| | B) Mineral potential map superimposed on shaded of topography, overlain by lineaments and Au occurrences..... | 111 |
| Figure 7.9: | Graph showing the positive weight (W+) of all evidence maps which used to predict Au-Cu occurrences map. | 113 |
| Figure 8. 1: | Predictive map of gold occurrences in West Java..... | 115 |
