COVER.....	i
APPROVAL SHEET.....	ii
DECLARATION.....	iii
ACKNOWLEDGEMENT.....	iv
ABSTRACT.....	vi
SARI.....	vii
TABLE OF CONTENTS	viii
LIST OF FIGURES	x
LIST OF TABLES	xiv
LIST OF APPENDIX	xv
CHAPTER I – INTRODUCTION	1
1.1 Background.....	1
1.2 Problem Statement	2
1.3 Objectives of the Research	3
1.4 Research Location	3
1.5 Scopes of Research	4
1.6 Expected Outcome of Research	4
1.7 Previous Works	5
1.8 Benefit and Originality	7
CHAPTER II – LITERATURE REVIEW.....	8
2.1 Regional Geology	8
2.1.1 Physiography.....	8
2.1.2 Tectonic Setting	9
2.1.3 Regional Structures	13
2.1.4 Stratigraphy.....	13
2.2 Petroleum System of Northeast Java Basin.....	19
2.3 Background Theory	22
2.3.1 Petroleum Reservoir.....	22
2.3.2 Sandstone Classification	23

2.3.3 Siliciclastic Reservoir	25
2.3.4 Petro-physical Rock Properties	32
CHAPTER III – HYPOTHESIS AND RESEARCH METHODS	39
3.1 Hypothesis	39
3.2 Research Methods	39
3.2.1 Research Data	39
3.2.2 Research Material	41
3.2.3 Research Stages	44
CHAPTER IV – PETROLOGY, MINERALOGY AND PETROPHYSICS...47	
4.1 Stratigraphic Section	47
4.2 Petrographic Analysis.....	50
4.3 XRD Analysis.....	55
4.4 Granulometry Analysis.....	59
4.5 Paleontologic Analysis	66
4.6 Lithofacies	68
4.7 Petrophysics Analysis.....	82
CHAPTER V – SANDSTONE CHARACTERISTICS AND DEPOSITIONAL ENVIRONMENT	84
5.1 General	84
5.2 Sedimentary Facies Distribution	84
5.3 Facies Association and Depositional Environments	92
5.4 Vertical and Lateral Succession	92
5.5 Petrophysical Properties and Reservoir Potential.....	95
5.5.1 Parameters of Porosity and Permeability	95
5.5.2 Geologic Aspects	95
5.5.3 Reservoir Characteristics of Ngrayong Sandstone.....	96
5.5.4 Geological Characteristics of Ngrayong Sandstone	97
CHAPTER VI –CONCLUSION	100
6.1 Conclusion.....	100
6.2 Recommendation.....	101
REFERENCES.....	102

LIST OF FIGURES

	Page
Figure 1.1	Location map of the NE Java showing the research location, Rembang area..... 4
Figure 2.1	Geomorphologic map of North East Java Basin showing the research area (van Bemmelen, 1949)..... 9
Figure 2.2	Tectonic elements and distribution of known hydrocarbon occurrences at East Java Basin (Sribudiyanti <i>et. al.</i> , 2003)..... 11
Figure 2.3	Tectonic provinces in the Northeast Java basin (after Darman and Sidi, 2000)..... 12
Figure 2.4	Geological map of the Rembang and surrounding area, NE Java, Indonesia (Kadar and Sudijono, 1993)..... 15
Figure 2.5	The stratigraphic succession of Rembang area (after Sharaf <i>et. al.</i> , 2000)..... 16
Figure 2.6	The classification of sandstones (Pettijohn, 1975)..... 24
Figure 2.7	Various clastic depositional environments..... 26
Figure 2.8	River-dominated deltaic environments (Slatt, 2007)..... 27
Figure 2.9	Characteristics of a storm-dominated shelf environment (Nichols, 2009)..... 29
Figure 2.10	Characteristics of a tide-dominated shelf environment (Nichols, 1999)..... 29
Figure 2.11	Types of clay distribution (Jahn <i>et al.</i> , 2008)..... 32
Figure 2.12	Three basic types of pores (Selley, 1998)..... 33
Figure 2.13	Various textural properties of clastic sediments and sedimentary rocks..... 34
Figure 2.14	Impact of sorting on reservoir quality (Jahn <i>et al.</i> , 2008)..... 35
Figure 2.15	Grain packing and it effect on porosity (Halliburton, 2001)..... 35
Figure 2.16	The burial processes of compaction and cementation on porosity (Slatt, 2007)..... 36
Figure 2.17	Permeability and grain size and shape (Halliburton, 2001)..... 38

Figure 3.1	Flow chart of proposed research showing the stages involved.....	45
Figure 4.1	Location map of five measured stratigraphic sections (A. B. C. D and E).....	48
Figure 4.2	Moderately sorted, matrix-supported, fine-grained sandstone from the stratigraphic Section A (Sp-A2) under (a) open nicol and (b) cross nicol.....	51
Figure 4.3	Moderately sorted, matrix-supported, medium-grained sandstone from the stratigraphic Section A (Sp.A5) under (a) open nicol and (b) cross nicol.....	51
Figure 4.4	Very well sorted, grain-supported, fine-grained sandstone from the stratigraphic Section B (Sp-B6) under (a) open nicol and (b) cross nicol.....	51
Figure 4.5	Very well sorted, grain-supported, fine-grained sandstone from the stratigraphic section C (Sp-C8) under (a) open nicol and (b) cross nicol.....	52
Figure 4.6	Well sorted, grain-supported, very fine sandstone from the stratigraphic section D (Sp.D8) under (a) open nicol and (b) cross nicol.....	52
Figure 4.7	Very well sorted, grain-supported, fine sandstone from the stratigraphic section E (Sp.E6) under (a) open nicol and (b) cross nicol.....	52
Figure 4.8	QFL classification plot of arenite (Pettijohn, 1975) and plot of different sandstone samples from Rembang area	54
Figure 4.9	QFL classification plot of greywacke (Pettijohn, 1975) and plot of different sandstone samples from Rembang area.....	54
Figure 4.10	X-ray diffraction pattern of lithic greywacke (Sample A5) from Rembang area. RM: Random Mount.....	56
Figure 4.11	X-ray diffractograms of clay mineral assemblage from lithic greywacke (Sample A5) from Rembang area. AD: Air dried, EG: Ethylene glycolated.....	57
Figure 4.12	X-ray diffraction pattern of sub-feldspathic arenite (Sample A17) from Rembang area. RM: Random Mount.....	57

Figure 4.13	X-ray diffractograms of clay mineral assemblage from subfeldspathic arenite (Sample A17) from Rembang area. AD: Air dried, EG: Ethylene glycolated.....	58
Figure 4.14	X-ray diffractograms of clay mineral assemblage from sublithic arenite (Sample E7) from Rembang area. AD: Air dried, EG: Ethylene glycolated.....	58
Figure 4.15	X-ray diffractograms of clay mineral assemblage from sublithic arenite (Sample E7) from Rembang area. AD: Air dried, EG: Ethylene glycolated.....	59
Figure 4.16	Sieving machine utilized in the granulometry analysis.....	60
Figure 4.17	(a) Transverse section of <i>Discocyclusina sp.</i> at the surface of limestone outcrop and (b) Nummulite (<i>Discocyclusina sp.</i>) in the limestone sample (D9).....	67
Figure 4.18	<i>Lepidocyclusina sumatrensis?</i> in (a) axial section and (b) oblique section in the limestone of Ngrayong Formation.....	67
Figure 4.19	(a) <i>Planorbulinella</i> and (b) <i>Miogyopsinoides</i> in limestone of Ngrayong Formation from Rembang area.....	67
Figure 4.20	Cross-bedded sandstone facies at measured section A, C and E.	69
Figure 4.21	Cross bedded sandstone facies showing (a) trough cross stratification and (b) herring bone cross stratification.....	70
Figure 4.22	Carbonaceous mudstone facies at measured section B.....	71
Figure 4.23	Carbonaceous shale facies exhibiting (a) mud cracks and (b) leaf fossil within this facies.....	71
Figure 4.24	(a) Carbonaceous shale facies exhibiting scattered amber clasts (b) sharp contact with laminated shale facies observed at the upper part of the section B.....	72
Figure 4.25	Laminated shale facies observed at measured section B and C...	72
Figure 4.26	(a) Laminated mudstone facies showing thinly laminated nature and friable character and (b) thinly bedded mudstone near the contact with carbonaceous mudstone facies at the basal part.....	73
Figure 4.27	(a) Gypsum flake at the contact between carbonaceous mudstone and the laminated shale facies and (b) gradational	

	contact between laminated shale face (in the lower part) and thin-bedded sandstone facies.....	73
Figure 4.28	Laminated shale facies observed at measured section B and C....	75
Figure 4.29	Thin-bedded sandstones observed at (a) section B and (b) section E.....	75
Figure 4.30	Current (Sinuous) ripple in the thin-bedded sandstone facies.....	76
Figure 4.31	Massive sandstone facies at measured section A and C.....	77
Figure 4.32	Massive sandstone facies showing (a) massive character and (b) flaser mud within the massive sandstone.....	77
Figure 4.33	Flaser bedding and convolute lamination in the massive sandstone facies.....	77
Figure 4.34	Bioturbated sandstone facies at measured section A.....	78
Figure 4.35	(a) Outcrop nature of bioturbated sandstone facies and (b) oxidized burrow structure within the bioturbated sandstone facies.....	79
Figure 4.36	Fossiliferous sandstone facies at measured section B, D and E..	80
Figure 4.37	(a)Outcrop nature of fossiliferous sandstone facies and (b) close up view of the fossils in the fossiliferous sandstone facies.	80
Figure 4.38	Bioclastic limestone facies at measured section A, B, C and D...	82
Figure 5.1	Five measured stratigraphic sections.....	85
Figure 5.2	Lithofacies log of measured stratigraphic section A.....	86
Figure 5.3	Lithofacies log of measured stratigraphic section B.....	87
Figure 5.4	Lithofacies log of measured stratigraphic section C.....	88
Figure 5.5	Lithofacies log of measured stratigraphic section D.....	90
Figure 5.6	Lithofacies log of measured stratigraphic section E.....	91
Figure 5.7	Stratigraphic correlation of Ngrayong Sandstone in measure stratigraphic sections at Rembang area, NE Java Basin	94

LIST OF TABLES

	Page
Table 2.1 Characteristics of selected depositional environments (Jahn <i>et al.</i> , 2008).....	26
Table 4.1 Texture and fabrics of sandstones determined from petrographic study.....	53
Table 4.2 The Wentworth grain-size scale of sediments.....	60
Table 4.3 Result of ϕ_n value derived from cumulative curve for the sample.....	61
Table 4.4 Mean value (M) and size class for analyzed samples.....	62
Table 4.5 Sorting vs. standard deviation.....	63
Table 4.6 Standard deviation and sorting class for the analyzed samples.....	63
Table 4.7 Skewness.....	64
Table 4.8 Skewness value derived from graphic method.....	64
Table 4.9 Kurtosis.....	65
Table 4.10 Kurtosis value derived from graphic method.....	66
Table 4.11 Summary result of petrophysics analysis.....	83
Table 4.12 Classification of qualitative porosity (Koesoemadinata, 1980)	83
Table 4.13 Quality scale of permeability (Koesoemadinata, 1980)	83
Table 5.1 Reservoir permeability classification.....	95

LIST OF APPENDIX

	Page
Appendix A1 Granulometric Analysis (Phi vs Individual wt% plot).....	106
Appendix A2 Granulometric Analysis (Phi vs Cummulative wt% plot)	109
Appendix B Petrographic Analysis	112
Appendix C XRD Analysis	122
Appendix D Lithostratigraphic sections.....	131
