

TABLE OF CONTENTS

ABSTRACT.....	i
TABLE OF CONTENTS.....	ii
TABLE OF FIGURES	iv
LIST OF TABLES	vii
CHAPTER I INTRODUCTION.....	1
1.1. Background	1
1.2. Problems Formulation.....	5
1.3. Objectives of the Research.....	6
1.4. The Benefits of the Research	6
1.5. The Authenticity of the Research.....	7
CHAPTER II LITERATURE REVIEW	12
2.1. Karst Landscape	12
2.2. Karst Aquifer and Karst Drainage Basin	14
2.3. Karst Springs.....	20
2.4. Karst Spring Hydrograph	22
2.4.1. Karst spring hydrograph	22
2.4.2. Recession Curve	25
2.4.3. Master Recession Curve	30
2.5. Karst Drainage Systems Development	32
2.6. Theoretical Framework	33
CHAPTER III RESEARCH METODOLOGY	35
3.1. Defining the Research Area	35
3.2. Data Collection	37
3.3. Research Material and Equipment	37
3.4. Research Procedure.....	38

3.4.1. Pre-Field Survey	38
3.4.2. Field Survey	40
3.4.3. Post-Field Survey.....	43
4.1. Geology.....	53
4.2. Geomorphology	56
4.3. Soil and Land-use	59
CHAPTER V RESULTS AND ANALYSIS.....	66
5.1. The Characteristics of Recession Curves.....	66
5.1.1. Gilap Cave	66
5.1.2. Beton Spring	70
5.1.3. Bribin Cave.....	73
5.1.4. Ngreneng Cave	78
5.1.5. Kakap Spring	81
5.2. The Characteristics of Karstification Degree in Gunung Sewu.....	87
5.2.1. Karstification degree of Gilap Cave	90
5.2.2. Karstification degree of Beton Spring	92
5.2.3. Karstification degree of Bribin Cave	93
5.2.4. Karstification degree of Ngreneng Cave	95
5.2.5. Karstification degree of Kakap Spring	96
5.3. Management of karst aquifer based on the karstification degree for sustainable karst water resources management in Gunung Sewu.....	101
CONCLUSIONS	128
RECOMMENDATION	129
BIBLIOGRAPHY.....	131
APPENDIX.....	138

TABLE OF FIGURES

Figure 1. 1. Oblique aerial view of Gunung Sewu conical hills.	2
Figure 1. 2. Typical doline pond (telaga) in Gunung Sewu.....	3
Figure 2. 1. Types of hydrogeological structures	15
Figure 2. 2. Karst hydrogeological zones	17
Figure 2. 3. Confined, unconfined and perched aquifers.....	18
Figure 2. 4. Conceptual models for karst aquifer	19
Figure 2. 5. Different spring types based on the hydraulic head and geologic controls	22
Figure 2. 6. Single storm hydrograph with various features and numerical measures	24
Figure 2. 7. Examples of hydrograph forms in karst springs and streams.....	25
Figure 2. 8. Baseflow component in a hydrograph.....	26
Figure 2. 9. Example of a recessional hydrograph with two laminar and two turbulent sub-regimes of an overflow/ underflow spring system.....	28
Figure 2. 10. An example of MRC using matching strip method.....	31
Figure 2. 11. An example of MRC using correlation method	32
Figure 2. 12. Internal flow system of karst aquifer	33
Figure 2. 13. Theoretical framework of the research.....	34
Figure 3. 2. Onset HOBO water level data logger kit	40
Figure 3. 3. Onset Hobo water level data logger installation and data download procedure.....	41
Figure 3. 4. Illustration for surface floats method	42
Figure 3. 5. Schematic view of velocity measurement	43
Figure 3. 6. An example of stage discharge rating curve	44
Figure 3. 7. Four flow components in ideal recession hydrograph (master recession curve.....	46
Table 3. 4. Karstification degree in recharge areas of springs according to recession curves parameters.....	47
Figure 3. 8. Research Procedures.....	52

Figure 4. 1. The Oyo River and Besole group that extend from north-east to south-west of the Gunung Sewu karst area. (Photo by: Fatchurohman, 2017).....	54
Figure 4. 2. Fossiliferous limestones classification	55
Figure 4.3. Interpretation of labyrinth-cone karst based on aerial photograph and lineament analysis	57
Figure 4. 4. Interpretation of polygonal karst based on aerial photograph and lineament analysis.....	58
Figure 4. 5. Interpretation of residual karst based on aerial photograph and lineament analysis	58
Figure 4. 6. Geological Map of Gunung Sewu Karst Area.....	60
Figure 4. 7. Vertisol soil with deep wide cracks in the dry season, Wonogiri	61
Figure 4. 8. Irrigated rice fields in Ponjong sub-district.....	64
Figure 4. 9. Localized concentric type of settlement in Gunung Sewu karst	64
Figure 4. 10. Land-use map of Gunung Sewu	65
Figure 5. 1. Hydrogeological map of Bribin underground river system	67
Figure 5. 2. Stage discharge rating curve of Gilap Cave	68
Figure 5. 3. Hydrograph data series of Gilap Cave	68
Figure 5. 4. Single recession curve calibration in Gilap Cave.....	69
Figure 5. 5. Master recession curve of Gilap Cave.....	70
Figure 5. 6. Beton Spring conditions	71
Figure 5. 7. The hydrograph of Beton Spring	72
Figure 5. 9. Stage-discharge rating curve of Bribin Cave	74
Figure 5. 11. Baron River and the landscape of Gunung Sewu karst.....	76
Figure 5. 12. Master recession curve of Bribin Cave	77
Figure 5. 13 The stage-discharge rating curve of Ngreneng Cave	78
Figure 5. 14. The hydrograph of Ngreneng Cave	79
Figure 5. 15. A single recession curve calibration at Ngreneng Cave.....	80
Figure 5. 16. Master recession curve of Ngreneng Cave.....	81
Figure 5. 17. Automatic waterlevel data logger installation at Kakap Spring.....	82
Figure 5. 18. Stage-discharge rating curve of Kakap Spring.....	83
Figure 5. 19. The hydrograph of Kakap Spring.....	84
