

INTISARI

Waduk Sermo merupakan satu-satunya waduk yang berada di Daerah Istimewa Yogyakarta. Dalam pembangunannya Waduk Sermo memiliki fungsi sebagai sarana irigasi dan pengendali banjir. Namun seiring berjalannya waktu, fungsi Waduk Sermo bertambah menjadi sarana pariwisata. Dalam kegiatan pariwisata tersebut menghasilkan efek negatif bagi lingkungan, diantaranya ialah sampah. Sampah yang dihasilkan dari aktivitas pariwisata di area wisata tersebut kini telah mencemari area wisata Waduk Sermo dan membuat kualitas air di Waduk Sermo menurun . Hal itu salah satunya akibat dari kurangnya sarana pengelola sampah dan minimnya kesadaran masyarakat dan wisatawan akan keasrian lingkungan.

Kata Kunci : Waduk Sermo, Pariwisata, Dampak lingkungan, Sampah

ABSTRACT

Sermo Reservoir is the one and only reservoir that is located in Yogyakarta. In Sermo reservoir construction has a function as a means of irrigation and flood control. But over time, the function of the Sermo Reservoir increased to tourism facilities. In the tourism activities produce negative effects on the environment, among them are garbage. Waste generated from tourism activities in the tourist area now has polluted area Sermo Reservoir travel and make the quality of water in the Sermo Reservoir declined. It was one of them as a result of the lack of waste management facilities and the lack of public awareness and tourists will be the environmental soundness.
