APPENDIX	56

LIST OF TABLES

	page
Table 1. Sesame mutant lines were selected based on plant height and number of capsules per plant in some gamma irradiation dosages treatments..	13
Table 2. Agronomical characteristics of sesame	15
Table 3. Analysis of variance.....	19
Table 4. Ancova for agronomical characteristics of sesame.....	20
Table 5. Field description.....	23
Table 6. Qualitative traits in M ₄ and M ₅ generations of sesame mutant lines.....	31
Table 7. Performance M ₄ and M ₅ generations of sesame mutant lines.....	33
Table 8. Genetic parameters for quantitative traits in sesame mutant lines.....	34
Table 9. The genotypic and phenotypic coefficients of variation for quantitative traits in sesame mutant lines.....	38
Table 10. Heritability for seed yield and yield related characteristics in sesame mutant lines.....	41
Table 11. The genotypic and phenotypic correlation coefficients for seed yield and yield related characteristics in sesame mutant lines.....	43
Table 12. The comparison genetic parameter of M ₄ and M ₅ generations on sesame yield components	46

LIST OF FIGURES

	page
Figure 1. Plant characteristics: growth type (1 = Indeterminate); growth habit (3 = Erect).....	24
Figure 2. Stem characteristics, a. Stem shape in cross section (2 = Square), b. Stem branching (1 = Opposite)	25
Figure 3. Root system, a. 1 (Shallow fibrous), b. 2 (Deep thin taproot).....	26
Figure 4. Leaf arrangement.....	26
Figure 5. Basal leaf margin.....	27
Figure 6. Lobe incision of basal leaf.....	27
Figure 7. Inflorescence characteristics.....	28
Figure 8. Capsule characteristics, a. Number of locules per capsule (1 = Four); Capsule arrangement (1 = Monocapsular), b. Anthocyanin coloration of capsule (0 = Absent); Color of dry capsules (2 = Straw/yellow).....	29
Figure 9. Bicapellate capsule shape.....	29
Figure 10. Seed characteristics	30
Figure 11. Seed coat color, a. 2 (Cream), b. 12 (Bright black), c. 6 (Dark brown)..	30

LIST OF APPENDIX

	page
Appendix 1. Completely randomized design in M ₄ generation of sesame mutant lines.....	57
Appendix 2. Completely randomized design in M ₅ generation of sesame mutant lines	58
Appendix 3. Genotypic correlation coefficients for seed yield and yield related characteristics in sesame mutant lines.....	59
Appendix 4. Phenotypic correlation coefficients for seed yield and yield related characteristics in sesame mutant lines.....	61
