

TABLE OF CONTENT

COVER	i
ENDORSMENT	ii
DECLARATION	iii
PREFACE	iv
TABLE OF CONTENT	v
LIST OF TABLES.....	viii
LIST OF FIGURES	ix
ABSTRACT	x
CHAPTER 1 INTRODUCTION.....	1
1.1 Background.....	1
1.2 Problem Analysis	2
1.3 The Objective of The Research.....	3
1.4 Research Scope	3
1.5 Content of Report.....	4
CHAPTER 1 THEORETICAL BASIS	5
2.1 Bathymetri	5
2.2 Current	5
2.3 Waves	6
2.3.1 Wave pressure	8
2.4 Wind	8
2.4.1 Wind Speed	9
2.5 Breakwater.....	11
2.5.1 Curtain wall breakwater.....	12
2.6 Water level fluctuations.....	14
2.4.1 Wind Speed	15
2.7 Loads	16
2.7.1 Vertical Load.....	16
2.7.2 Horizontal Loads	16

2.7.3	Loads combination	23
CHAPTER 3	DESIGN CRITERIA.....	26
3.1	Location and layout.....	26
3.1.1	Platform Layout.....	27
3.1.2	Bathymetry.....	27
3.2	Wind Data.....	28
3.3	Oceanographic data.....	32
3.4	Materials Quality.....	34
3.4.1	Beam Specification.....	34
3.4.2	Steel Pipe Pile Specification	34
CHAPTER 4	PLATFORM LOADING LOADING	35
4.1	Vertical Load	35
4.1.1	Distributed Dead Loads	35
4.1.2	Distributed Live Loads	35
4.1.3	Crane Load.....	35
4.2	Horizontal Loads.....	37
4.2.1	Impact from ships.....	37
4.2.2	Mooring loads	47
4.2.3	Earthquake Force.....	51
CHAPTER 5	STRUCTURE ANALYSIS	56
5.1	Structural Modeling.....	56
5.2	Wave Pressure.....	56
5.3	Pile Load Capacity	58
5.3.1	Axial Load Capacity	59
5.3.2	Lateral Load Capacity.....	61
5.3.3	Lateral Deflection.....	61
5.4	Strength Limit	63
5.4.1	Limiting Slenderness Ratios	64
5.4.2	Compressive Strength.....	65
5.4.3	Bending and Axial Compression.....	66

CHAPTER 6 CONCLUSIONS AND RECOMENDATIONS.....	69
6.1 Conclusions and Recommendations.....	69
6.1.1 Conclusions.....	69
6.1.2 Recommendations	70
BIBLIOGRAPHY.....	71
APPENDIX	73
