DECLARATION	i
DEDICATION	ii
ABSTRACT	iii
SARI	iv
ACKNOWLEDGEMENTS.....	v
TABLE OF CONTENTS.....	vi
LIST OF FIGURES	ix
LIST OF TABLES	xii
I. INTRODUCTION.....	1
1. Background.....	1
2. Problem Formulation.....	2
3. Purpose and Objective of the Research.....	3
4. Research Area.....	3
5. Previous Studies	4
6. Originality Research.....	5
II. LIRETATURE REVIEW	8
1. Theoretical Background	8
1.1. Introduction	8
1.2. Occurrence and Setting.....	8
1.3. Formation Mechanism.....	10
1.4. Characteristics Cement Mineralogy	12
1.5. Controls on Beachrock Formation.....	14
1.6. Effect of Beachrock on Coastlines	15
1.7. Anthropogenic Beachrock Formation	16
2. Regional Geology.....	18
3. General Stratigraphy of Ryukyu Limestone.....	19
3.1. The Ryukyu Group	20
3.2. The Minatogawa Limestone Formation	22
3.3. Tectonic Setting of Okinawa-jima.....	26
4. Sedimentary Environment	32
5. Carbonate Classification.....	36
6. Crystal Growth Mechanism.....	38

7.	Hypothesis	39
III.	RESEARCH METHODOLOGY	41
1.	General.....	41
2.	Desk Study.....	41
3.	Field Investigation	43
4.	Laboratory Works.....	43
4.1.	Petrographis Studies	44
4.2.	Rock Physical Property Analysis (NP test)	44
4.3.	Geochemical Analysis	45
5.	Anthropogenic Beachrock	46
IV.	RESULTS AND DISCUSSION	49
1.	Geology Area Study	49
2.	Natural Beachrock	51
2.1.	Samples Categorized	51
2.2.	Petrography Analysis.....	53
2.3.	Micropaleontology Analysis	58
2.4.	Rock Physical Property Analysis (NP Test).....	59
2.5.	Geochemical Analysis	60
3.	Anthropogenic Beachrock	64
3.1.	Making Culture Medium (ZoBell2216E).....	65
3.2.	Preparation for Solidification Experiment.....	66
3.3.	Solidification Experiment Test.....	68
3.4.	Rock Physical Property Analysis (NP Test).....	71
3.5.	Geochemical Analysis	72
4.	Discussion.....	77
V.	CONCLUSION AND RECOMMENDATION	85
1.	Conclusion	85
2.	Recommendation	86
IV.	REFERENCES	87
	Appendix A: Sample Categorized	94
	Appendix B: Petrography Analysis	98
	Appendix C: Point Counting	123
	Appendix D: Needle Penetration Test UCS Measurement	183

Appendix E: XRD Analysis 197

LIST OF FIGURE

Figure 1.1 The Location of Okinawa Prefecture, Japan (http://blog.daum.net/thaistart/18311642).....	4
Figure 2.1 Model of Beachrock and Cayrock Formation (Gischler and Lomando, 1997).	11
Figure 2.2 Diagenetic Environments with Associated Cement Mineralogy And Morphology (Gischler, 2007).	12
Figure 2.3 Possible Control on Beachrock Formation as Listed (Vousdoukas et al., 2007).	14
Figure 2.4. Image of Urease Bacteria Pararhodobacter sp and Oceanisphaerae sp ..	16
Figure 2.5. Archipelago Ryukyu Islands (Tokashiki and Aydan, 2010).....	17
Figure 2.6. Stratigraphic Sequence of the Quaternary System of Okinawa-jima (Takayasu, 1978).....	22
Figure 2.7. Geologic Outline of Okinawa-jima (Takayasu, 1978).....	23
Figure 2.8. Geological Map of Okinawa-jima (Nakae, et. al., 2010).....	24
Figure 2.9. Topography and Main Geographical Region of Japan (NUMO TR04-04- 04, AIST Permission no. 63500-A-20040811-004).....	25
Figure 2.10. Current Tectonic Situation of Japan and Key Tectonic Features (NUMO TR04-04-04).....	27
Figure 2.11. Schema of the Sedimentary Process of Ryukyu Group (Takayasu, 1978)	29
Figure 2.12. Scheme of Marine Environment Divided Into Zones (Bascom, 1964 .	33
Figure 2.13. Schematic Representation of The Relationship of Characteristic Trace Fossils to Sedimentary Facies and Depth Zones in the Ocean (Ekdale, et.al., 1984).....	35
Figure 2.12. Folk Classification Limestone (Folk, 1959).....	36
Figure 2.13. Dunham Classification of Carbonate Rocks (Dunham, 1962)	37
Figure 2.14. Textural Classification of Reef Limestone After Embry & Klovan (1971).....	37
Figure 2.15. Crystallization Growth Mechanism, (a) Ions Attachments to the Crystal Base During Time Growth, (b) Illustrated Crystals Growth Interlocking Each Other Until Settlement, and (c) Figure Crystallization During Time Inside Rock (Bingham, C., 2004).	38
Figure 3.1. Flowchart Research Methodology	40

Figure 3.2. Syringe Solidification Test.....	46
Figure 4.1. Beachrock Deposits In Gima, Yomitan, and Sumuide	47
Figure 4.2. Beachrock Morphology In Okinawa Island.....	48
Figure 4.3. Image Of Categorized Samples from Study Area.....	49
Figure 4.4. Image Of Yomitan Study Area, Okinawa Island, Japan	50
Figure 4.5. Image Of Gima Study Area, Okinawa Island, Japan.....	50
Figure 4.6. Image Of Sumuide Study Area, Okinawa Island, Japan.....	51
Figure 4.7. Petrography of Beachrock Thin Section, The Upper Part Are Using PPL and The Lower Part Using XPL (A) Yomitan Sample Shown Micrite Cemented Between Foraminifera and Skeletal Fragment (B) Gima Sample Shown Aragonite Sparite Filled Inside Skeletal Fragment and (C) Sumuide Sample Found Quartz During Cementation Process, Non Carbonate Fragment.	52
Figure 4.8. Picture One of Beackrock Samples from Gima (left) and Thin Section (Right) (Appendix BYG).	54
Figure 4.9. Picture One of Beackrock Samples from Yomitan (left) and Thin Section (Right) (Appendix BYB).	55
Figure 4.10. Picture One of Beackrock Samples from Sumuide (left) and Thin Section (Right) (Appendix BSB).	55
Figure 4.11. Figure of Graphic Plot UCS Strength Distribution Beachrock Deposit.	57
Figure 4.12. Figure of SEM/ EDX Imagine (a) SEM Microscopy Natural Beachrock Sample, (b) Mg Element Distribution Sample, (c) Ca Element Distribution Sample, and (d) is Graphic Element Based On X-Ray Energy Dispersive..	61
Figure 4.13. Figure Bacteria Serving As Nucleation CaCO ₃ Precipitation Sand Particles (DeJong, et al., 2010).	62
Figure 4.14. Figure Anthropogenic Beachrock Chard, Optical Density of Bacteria Species (Pararhodobacter sp. and Oceanicsphereae sp.).....	66
Figure 4.15. Graphic Ca Ion Versus Time.	68
Figure 4.16. Graphic pH Versus Time.	68
Figure 4.17. Image Anthropogenic Beachrock After 14 Days Solidification Solution Test.....	69
Figure 4.18. Graphic Plot of UCS Strength Intake Anthropogenic Beachrock Samples (Left) and Image Needle Penetrating Test (Right).	70
Figure 4.19. SEM Using Magnification 2000 Anthropogenic Beachrock Samples.	72

Figure 4.20. Figure of SEM/ EDX Imagine (a) SEM Microscopy Anthropogenic Beachrock Sample, (b) Mg Element Distribution, (c) Ca Element Distribution, and (d) is Graphic Element Based On X-Ray Energy Dispersive.....	73
Figure 4.21. Figure of XT Scan During Anthropogenic Beachrock, (a) Figure of Solidification Test Inside Syringe, (b) Before Solidification Solution Test, and (c) After Solidification Solution Test (Courtesy Anchal and Mitsuyama).	74
Figure 4.23. Schematic Illustration of Coast Zones, Cement Fabrics, and Mineralogy-Formation Environments of The Beachrocks (M.H.W. Mean High Water Level, M.T.L. Mean Mean Tidal Water Level, M.L.W. Mean Low Water Level) (Modified by Mauz et al., 2015).....	75
Figure 4.24. Cement Identificatons Based On Sumuide A Sample with 100x Magnificent.	75
Figure 4.25. Cement Identificatons Based On Sumuide B (Left) Sample and Sumuide C (Right) Sample with 100x Magnificent.....	76

LIST OF TABLES

1.1	Comparison Between Previous Studies and This Studies	6
2.1.	Comparison between the main limestones and the accessory limestones	20
4.1.	Percentage Compositions	59
4.2.	Percentage Comparison Calcite-Aragonite	61
4.3.	Bulk Sample Chemical Analysis of Trace Elements.....	61
4.4.	Composition Make Culture Medium.....	66
4.5.	Medium Composition.....	67
4.6.	Anthropogenic Beachrock Differentiation	69
4.7.	Consolidation Nutrient Solution (CaCl ₂ : 0.5M; (NH ₂) ₂ CO: 0.5M)	70
4.8.	Bulk Sample Chemical Analysis of Trace Elements.....	74
4.9.	Name of Natural Beachrock Samples (Based on Carbonate Classifications)	81
4.10.	Comparison Natural Beachrock and Anthopogenic Beachrock.....	83
