

TABLE OF CONTENTS

PAGE OF TITLE	i
PAGE OF APPROVAL	iii
STATEMENT OF ORIGINALITY	iv
ACKNOWLEDGEMENT	v
TABLE OF CONTENTS	vi
LIST OF TABLES	ix
LIST OF FIGURES	xii
ABSTRACT	xiii
INTISARI.....	xiv
CHAPTER 1 INTRODUCTION	1
1.1. Background	1
1.2. Objectives	2
1.3. Expected Benefit from the Research.....	2
CHAPTER 2 LITERATURE REVIEW	3
2.1. The role of potassium uptake in soybean.....	3
2.2. Potassium deficiency in soybean plant	4
2.3. Metabolomics profiling.....	6
CHAPTER 3 RESEARCH METHODOLOGY	8
3.1. Time and Location	8
3.2. Materials and Equipments.....	8
3.3. Research Design.....	8
3.4. Research Steps	8
3.4.1. Plant materials and growth conditions.....	8
3.4.2. Collection of root exudates, shoots and roots.....	9
3.4.3. Biomass and K ⁺ concentration measurement.....	9
3.4.4. Preparation of root exudates for metabolome analysis.....	10

3.4.5. Preparation of shoot and root for metabolome analysis	10
3.4.6. Metabolome analysis	11
3.4.7. Statistical analysis	12
CHAPTER IV RESULT AND DISCUSSION	13
4.1. Result	13
4.1.1. Effect of different potassium concentration on growth of soybean.....	13
4.1.2. Metabolites profiles of soybean shoot extract under potassium deficient condition	16
4.1.3. Metabolites profiles of soybean shoot extract under potassium toxic condition	40
4.1.4. Metabolites profiles of soybean root extract under potassium deficient condition	47
4.1.5. Metabolites profiles of soybean root extract under potassium toxic condition	69
4.1.6. Metabolites profiles of soybean root exudates under potassium deficient condition	76
4.1.7. Metabolites profiles of soybean root exudates under potassium toxic condition	86
4.2. Discussion	90
4.2.1. Response of metabolites in shoot, root, and root exudates under potassium deficient condition	90
4.2.2. Response of metabolites in shoot, root, and root exudates under potassium toxic condition	91
4.2.3. Response of identified metabolites in glycolysis, TCA cycle, and amino acid biosynthesis pathways in the shoot and root of two soybean cultivars at 7 and 14 DAT	92
4.2.4. Response of identified metabolites in polyamines metabolism pathway in the shoot and root of two soybean cultivars at 7 and 14 DAT	98

CHAPTER 5 CONCLUSION AND SUGGESTION	101
5.1. Conclusions	101
5.1. Suggestion	101
