

Pelaksanaan Perjanjian Pelayanan Kesehatan dalam Proses Persalinan

Antara Bidan Desa Puskesmas dengan Pasien di Kabupaten Bantul

Oleh : Nely Yeni¹

Penelitian ini bertujuan untuk mengetahui pelaksanaan perjanjian pelayanan kesehatan dalam proses persalinan antara bidan desa puskesmas dengan pasien di Kabupaten Bantul apakah sudah sesuai dengan peraturan perundang-undangan. Penelitian ini bersifat yuridis empiris dengan cara memadukan penelitian kepustakaan dan penelitian lapangan, selanjutnya hasil penelitian dianalisis dengan metode kualitatif dan kemudian disajikan secara deskriptif. Hasil dari penelitian menyimpulkan pelaksanaan perjanjian pelayanan kesehatan dalam proses persalinan antara bidan desa puskesmas dengan pasien di Kabupaten Bantul belum sesuai dengan peraturan perundang-undangan karena dalam menyampaikan informasi tentang tindakan pelayanan kesehatan masih terdapat kekurangan informasi yang tidak disampaikan dan bahasa yang digunakan oleh bidan desa kurang dimengerti oleh pasien.

**The Implementation of the Health Service Agreement in the Birth Process
Between the Midwife Community Health Center and the Patient in Bantul
District.**

By : Nely Yeni²

This research aims to examine the implementation the agreement in the health care birth process between the midwife community health center to patient in Bantul district if it is appropriate with the statutory regulations. This research is an empirical jurisdiction by combining the research literature and field research, then the results were analyzed with qualitative methods and then presented descriptively. The results of the study concluded agreement implementation of health care during the birth process between midwives community health centers with patients in Bantul district is not appropriate with the laws because in conveying information about the actions of health care there is still a lack of information that is not delivered and the language used by the midwife less understood by the patient.
