

## DAFTAR ISI

|  |      |
|--|------|
| HALAMAN JUDUL .....  | i    |
| HALAMAN PENGESAHAN .....                                     | ii   |
| PERNYATAAN .....   | iii  |
| KATA PENGANTAR .....   | iv   |
| DAFTAR ISI .....   | vi   |
| DAFTAR GAMBAR .....  | viii |
| DAFTAR TABEL .....   | ix   |
| INTISARI.....  | x    |
| ABSTRACT .....   | xi   |
| BAB I. PENDAHULUAN .....                                     | 1    |
| I.1 Latar Belakang .....                                     | 1    |
| I.2 Rumusan Masalah .....                                    | 4    |
| I.3 Batasan Masalah .....                                    | 4    |
| I.4 Tujuan Penelitian .....                                  | 5    |
| I.5 Daerah Penelitian dan Waktu Pengambilan Data .....       | 5    |
| BAB II. TINJUAN PUSTAKA .....                                | 6    |
| II.1 Kondisi Geologi .....                                   | 6    |
| II.1.1 Kondisi Geologi Regional .....                        | 6    |
| II.1.2 Stratigrafi Regional .....                            | 6    |
| II.1.3 Kondisi Geologi Daerah Penelitian .....               | 9    |
| II.1.4 Satuan Litologi dan Morfologi Daerah Penelitian ..... | 10   |
| II.1.5 Kemiringan Lereng.....                                | 11   |
| II.2 Tanah Longsor .....                                     | 12   |
| II.3 Tinjauan Geofisika .....                                | 13   |
| II.3.1 Mikrotremor .....                                     | 13   |
| II.3.2 <i>Site Effect</i> .....                              | 14   |
| II.3.3 Metode HVSR .....                                     | 15   |
| II.3.4 <i>Shear Strain</i> .....                             | 16   |

|   |    |
|---|----|
| BAB III. DASAR TEORI .....  | 17 |
| III.1 Gelombang Seismik.....                                      | 17 |
| III.1.1 Gelombang Badan.....                                      | 17 |
| III.1.2 Gelombang Permukaan .....                                 | 19 |
| III.2 Transformasi Fourrier .....                                 | 21 |
| III.3 Windowing.....  | 22 |
| III.4 HVSR ( <i>Horizontal to Vertical Spectral Ratio</i> ) ..... | 23 |
| III.5 <i>Shear Strain</i> ( $\gamma$ ) .....                      | 24 |
| BAB IV. METODE PENELITIAN.....                                    | 27 |
| IV.1 Waktu dan Tempat Penelitian.....                             | 27 |
| IV.2 Akuisi Data .....  | 28 |
| IV.2.1 Pengambilan Data Lapangan.....                             | 28 |
| IV.2.2 Peralatan Akuisisi Data .....                              | 29 |
| IV.2.3 Pengaturan Alat .....                                      | 29 |
| IV.3 Pengolahan Data.....   | 30 |
| IV.4 Diagram Alir Penelitian.....                                 | 32 |
| IV.5 Interpretasi Kualitatif.....                                 | 32 |
| BAB V. HASIL DAN PEMBAHASAN.....                                  | 34 |
| V.1 Titik Terukur dan Titik Terhitung .....                       | 34 |
| V.2 Frekuensi Dominan.....  | 36 |
| V.3 Ketebalan Lapisan Lapuk.....                                  | 36 |
| V.4 Nilai Amplifikasi .....                                       | 38 |
| V.5 <i>Shear Strain</i> .....                                     | 38 |
| V.6 Daerah Rawan Longsor.....                                     | 41 |
| BAB VI. KESIMPULAN DAN SARAN .....                                | 45 |
| VI.1 Kesimpulan .....   | 45 |
| VI.2 Saran .....  | 45 |
