

## INTISARI

Kinerja petani dalam program Kawasan Rumah Pangan Lestari (KRPL) tentu sangat penting guna mengevaluasi jalannya program. Tujuan dari penelitian ini yaitu : (1) menganalisis kinerja petani program KRPL di perkotaan dan perdesaan Daerah Istimewa Yogyakarta; (2) menganalisis kinerja kelompok tani perkotaan dan perdesaan berdasarkan penerimaan dari pengelolaan KRPL. Metode analisis yang digunakan pada penelitian ini adalah deskriptif kualitatif dan *Importance Performance Analysis* (IPA) untuk menganalisis kinerja petani, sedangkan uji normalitas, uji homogenitas, dan uji rerata adalah untuk menguji kinerja kelompok tani berdasarkan penerimaan dari pengelolaan KRPL. Hasil menunjukkan bahwa kinerja petani KRPL dalam tujuan pemenuhan kebutuhan pangan dan peningkatan produktivitas sudah baik, sedangkan kinerja petani KRPL dalam tujuan terjaganya kelestarian sumber pangan lokal dan peningkatan pendapatan belum baik. Kinerja kelompok tani perkotaan dan perdesaan berdasarkan penerimaan pengelolaan KRPL tidak berbeda nyata.

Kata kunci : Kawasan Rumah Pangan Lestari (KRPL), *Importance Performance Analysis* (IPA), kinerja

## ABSTRACT

*The performance of Sustainable Food Household Area (KRPL) is important to evaluating the progress of the programme. The objective of this study are to : (1) analyze the performance of Sustainable Food Household Area (KRPL) farmers in urban and rural of Daerah Istimewa Yogyakarta; (2) analyze the performance of urban and rural farmer groups based on the total revenue of Sustainable Food Household Area (KRPL). The method of analysis used in this study are qualitative descriptive and Importance Performance Analysis (IPA) to analyzing the performance of Sustainable Food Household Area (KRPL) farmers, meanwhile the normality test, homogeneity test, and independent t test are to testing the performance of farmer groups based on total revenue of Sustainable Food Household Area (KRPL). The results showed that the fulfillment needs of food and the increased of productivity got the good performance by the Sustainable Food Household Area (KRPL) farmers, meanwhile maintained of preservation the local food sources and the increased revenue haven't got the good performance yet by the Sustainable Food Household Area (KRPL) farmers. The performance of Sustainable Food Household Area (KRPL) farmer groups between urban and rural is not significantly different.*
