

TABLE OF CONTENT

Author's Declaration of Originality	v
Foreword	vi
Table of Contents.....	viii
List of Figures.....	xi
List of Tables.....	xii
Abstract.....	xiii
Chapter I : Introduction.....	1
1.1. Background.....	1
1.2. Problem Statement.....	3
1.3. Objectives.....	3
1.4. Impact of The Study.....	4
Chapter II : Literature Review.....	5
2.1. Wheat Straw.....	5
2.2. Enzymatic Hydrolysis.....	9
2.3. Biogas.....	10
2.4. Anaerobic Digestion.....	10
2.4.1. Hydrolysis Process.....	12
2.4.2. Acidogenesis Process.....	13
2.4.3. Acetogenesis Process.....	14
2.4.4. Methanogenesis Process.....	15
2.4.5. Process Parameters.....	16

2.4.6. Dry Anaerobic Digestion.....	20
2.5. Hypothesis.....	22
Chapter III : Materials and Methods.....	23
3.1. Materials.....	23
3.1.1. Wheat Straw.....	23
3.1.2. Inoculums.....	23
3.1.3. Chemicals.....	23
3.1.4. Laboratory Equipment.....	24
3.2. Time and Place of Experiment.....	24
3.3. Methods.....	25
3.3.1. Samples and Inoculum's Preparation.....	25
3.3.2. Anaerobic Digestion.....	25
3.3.3. Crystalline to Amorphous Cellulose Ratio of Wheat Straw.....	28
3.3.4. Sample Preparation for Lignocellulose Determination.....	29
3.4. Analysis.....	30
3.4.1. Analysis of Biogas Production.....	30
3.4.2. Analysis of Crystalline to Amorphous Cellulose Ratio using FTIR Spectrometer.....	31
3.4.3. Analysis of Acid Insoluble Lignin.....	31
3.4.4. Analysis of Structural Carbohydrates.....	32
Chapter IV : Results and Discussion.....	33
4.1. Wheat Straw and Inoculum Characterization.....	33

4.2. Effect of TS Content, S/I Ratio and Addition of Cellulase in Dry Anaerobic Digestion at Psychrophilic Condition.....	34
4.3. Effect of TS Content, S/I Ratio and Addition of Cellulase in Dry Anaerobic Digestion at Thermophilic Condition.....	37
4.4. The Influence of Dry Anaerobic Digestion at Lignocellulose Component in Wheat Straw.....	40
Chapter V : Conclusions and Future Work.....	43
5.1. Conclusions.....	43
5.2. Future Work.....	44
References.....	45
Appendixes	48

List of Figure

Figure 2.1. Sketch of wheat stem.....	6
Figure 2.2. Schematic presentation of hydrolysis by cellulase.....	9
Figure 2.3. The conversion process of organic matter into biogas.....	12
Figure 2.4. ‘Interspecies hydrogen transfer’ between acetogens and methanogens....	15
Figure 2.5. Methanogenic’ growth rate at various temperatures.....	18
Figure 2.6. Inhibition through acetic acid.....	20
Figure 3.1. Dry anaerobic digestion process for treated samples.....	27
Figure 3.2. Dry anaerobic digestion process for untreated samples.....	28
Figure 4.1. Methane production of wheat straw at psychrophilic condition.....	35
Figure 4.2. Hydrogen production of wheat straw at psychrophilic condition.....	36
Figure 4.3. Methane production of wheat straw at thermophilic condition.....	38
Figure 4.4. Wheat straw after digestion, (a) untreated and (b) treated sample.....	41
Figure 4.5. Crystalline to amorphous cellulose ratio of wheat straw before and after digestion.....	42

List of Tables

Table 2.1. Structural characteristic of wheat straw.....	7
Table 2.2. Biogas production from wheat straw in the previous studies.....	8
Table 2.3. The composition of Biogas.....	10
Table 2.4. Acetogenesis reaction.....	14
Table 2.5. Type of methanogenic bacteria.....	16
Table 2.6. Bacterial group according to temperature range.....	17
Table 3.1. Composition of wheat straw and inoculums with addition of water.....	26
Table 4.1. Characteristic of Inoculum and Wheat Straw.....	34
Table 4.2. Methane maximum yield and production rate at psychrophilic condition with TS content of 21% & 30% and S/I ratio of 1 & 2.....	35
Table 4.3. Methane maximum yield and production rate at thermophilic condition with TS content of 21% & 30% and S/I ratio of 1 & 2.....	38
Table 4.4. Cellulose, hemicellulose, & acid insoluble lignin from wheat straw before and after digestion.....	41
