

INTISARI

Latar Belakang: Salah satu program *Health Promoting University* Universitas Gadjah Mada adalah Posbindu PTM. Kegiatan Posbindu PTM berisiko tinggi terjadi kecelakaan kerja tertusuk jarum lanset, tertular penyakit menular dan tertular COVID-19. Posbindu PTM bertujuan untuk mencegah penyakit tidak menular yang dilaksanakan mulai dari meja 1 hingga meja 5.

Tujuan: Mengetahui perilaku keselamatan pada kader Posbindu PTM di Universitas Gadjah Mada dan perannya selama pandemi COVID-19.

Metode: Metode penelitian adalah kualitatif dengan pendekatan studi kasus deskriptif. Informan penelitian adalah kader Posbindu PTM. Metode pengumpulan data menggunakan metode wawancara mendalam dan observasi. Trustworthiness menggunakan triangulasi sumber data yaitu observasi dan wawancara kepada pimpinan Posbindu PTM.

Hasil: Kader Posbindu PTM mengetahui perilaku keselamatan ditahap perilaku sebelum cuci tangan dengan menggunakan air mengalir dan sabun, sesudah mencuci tangan dilap menggunakan tisu, membuka ujung jarum lanset dengan cara memutar dan penggunaan *handscoon* dengan melipat ujung pergelangan., sarana prasarana cuci tangan pada kegiatan Posbindu di era *new normal* telah tersedia mulai dari pintu masuk, di meja 1 hingga meja 5. Kader Posbindu PTM selama pandemi berperan dalam pencegahan COVID-19 dan pencegahan penyakit tidak menular dan penganggulangan COVID-19 di Universitas Gadjah Mada.

Kesimpulan: Kader Posbindu PTM mengetahui perilaku keselamatan ditahap perilaku sebelum dan sesudah mencuci tangan, membuka ujung jarum lanset dan penggunaan *handscoon*. Kader Posbindu PTM selama pandemi berperan dalam pencegahan COVID-19 dan pencegahan PTM dan penganggulangan COVID-19 di Universitas Gadjah Mada.

Abstract

Background: One of the *Health Promoting University* program at Gadjah Mada University is Posbindu non-communicable disease (NCD). The activities from this program have a high risk of work accident and infect by COVID-19. Posbindu NCD has a function to prevent non-communicable diseases which carry out from table 1 until table 5.

Purpose: Know the safety behavior of Posbindu NCD Cadres at Gadjah Mada University and their role during the COVID-19 pandemic.

Method: The research method is qualitative with a descriptive case study approach. Methods of collecting data using interviews and observation. Trustworthiness using data source triangulation in observation and interviews to Posbindu NCD leader.

Result: Posbindu NCD cadres know the safety behavior at the behavioral stage before washing hands using flowing water and soap, after washing hands wipe the hand using a tissue, opening the tip of the lancet needle by turning and using a handscoon by folding the end of the wrist. Handwashing facilities for Posbindu in the new normal era are available from the entrance, table 1 until table 5. Posbindu NCD cadres during the pandemic play a role to preventing COVID-19 and NCD and control COVID-19 at Gadjah Mada University.

Conclusion: Posbindu NCD knowing safety behavior in the phase before and after washing hand, open lancet needle tip and using handscoon. Posbindu NCD cadres during the pandemic played a role in preventing and control COVID-19 at Gadjah Mada University.
