PREFACE	iv
TABLE OF CONTENTS	v
LIST OF TABLES	vii
LIST OF FIGURES	viii
LIST OF APPENDICES	ix
ABSTRACT	x
INTISARI	xi
 I. INTRODUCTION	 1
1. Background	1
2. Formulation of the Problem	3
3. Research Gap	3
4. Objectives	4
5. Expected Outcomes	4
 II. LITERATURE REVIEW	 5
1. Cacao	5
2. <i>Phytophthora palmivora</i>	6
2.1. Classification	6
2.2. Biology of <i>Phytophthora palmivora</i>	6
2.3. Mating type of <i>Phytophthora palmivora</i>	10
2.4. <i>Phytophthora palmivora</i> phylogeny	10
3. Population Genetics	12
3.1. Population genetic diversity	14
3.2. Population genetic structure	16
3.3. Evolutionary forces	18
4. Microsatellite	22
4.1. Mutation mechanism in microsatellite	23
5. Population genetic studies on <i>Phytophthora</i> pathogen	25
6. Theory Basis	26
7. Hypothesis	27
8. Research Flow	28
 III. RESEARCH METHODOLOGY	 29
1. Time and Location	29
2. Material and Equipment	29
3. Research Procedures	31
3.1. Sample collection, isolation, and morphological identification ..	31
3.2. DNA extraction and molecular identification	31
3.3. SSR analysis	32
3.4. SSR Genotyping and data preparation	33
3.5. Data analysis	33
3.5.1. Population genetic diversity	33

3.5.2. Population genetic structure	34
IV. RESULT AND DISCUSSION	35
1. Morphology and Molecular Identification	35
2. Population Genetic Diversity	41
3. Population Structure	47
V. CONCLUSION AND SUGGESTION	49
1. Conclusion	49
2. Suggestion	49
REFERENCES	50
APPENDICES	58
