PREFACE	iv
TABLE OF CONTENTS	vi
LIST OF TABLES	ix
LIST OF FIGURES	xi
LIST OF APPENDICES	xiii
ABSTRACT	xiv
<i>INTISARI</i>	xv
CHAPTER	
I. INTRODUCTION	1
1. General Introduction	1
2. Problem	5
3. Research Purposes	7
4. Research Benefits	8
5. Research Authenticity	8
II. LITERATURE REVIEW AND THEORICAL BASIS	9
A. Literature Study	9
1. Rice crops.....	9
2. Sheath rot disease.....	11
2.1. Fungal pathogens caused the disease	14
2.1.1. <i>Sarocladium oryzae</i>	14
2.1.2. <i>Fusarium</i> spp.	16
2.2. Mycotoxins related with fungal pathogens	17
2.3. Molecular identification and characterization of fungal pathogens	18
B. Theory Basis	21
C. Hypothesis	24

III. MATERIALS AND METHODS	25
A. Material and Equipment.....	25
1. Research Material.....	25
2. Research Equipment	26
B. Time and Location.....	26
C. Procedures.....	26
1. Sampling, isolation, initial identification and pathogenicity test of <i>Sarocladium</i> sp. and <i>Fusarium</i> spp.....	26
1.1. Sample collection and fungal isolation.....	26
1.2. Pathogenicity Test.....	27
1.3. Initial identification and morphological characteristics.....	29
2. Molecular identification, and morphological characterization of <i>Sarocladium</i> sp. and <i>Fusarium</i> spp.....	30
2.1. Genomic DNA extraction	30
2.1.1 CTAB method.....	30
2.1.2. Pottasium ethyl xanthogenate (PEX) method	31
2.2. Fungal Identification	31
2.2.1. Identification using species-specific primer	31
2.2.1.1 PCR assay and gel visualization	31
2.2.2. Identification using sequencing method	32
2.2.2.1. PCR assay and gene sequencing	32
2.2.2.2. Alignment and phylogenetic analysis	33
2.2.3. Identification using RFLP method	37
2.2.3.1. PCR assay and gene sequencing	37
2.2.3.2. Development of a diagnostic PCR-RFLP technique for FIESC and FFSC.....	38
2.3. Cultural and morphological characterization.....	39
2.3.1. Observations on the colony morphology	39
2.3.2. Observations on the microscopic features	39
3. Genetic diversity of <i>Sarocladium</i> sp. and <i>Fusarium</i> spp. using rep-PCR	40
3.1. PCR assay and gel visualization	40
4. Bioecology studies of <i>Sarocladium oryzae</i> and <i>Fusarium</i> spp., and mycotoxins detection by encoding gene	41

4.1. Physiology Study of <i>Sarocladium oryzae</i> and <i>Fusarium</i> spp.	41
4.2. Detection of <i>Fusarium</i> spp. mycotoxin encoding genes.....	42
5. Rice varieties test against <i>Sarocladium oryzae</i> and <i>Fusarium</i> spp.....	43
IV. RESULT AND DISCUSSION	45
1. Sampling, isolation, initial identification and pathogenicity test of <i>Sarocladium</i> sp. and <i>Fusarium</i> spp.....	45
1.1. Sample collection and fungal isolation.....	45
1.2. Pathogenicity Test.....	46
1.3. Initial identification and morphological characteristics.....	48
2. Molecular identification, and morphological characterization of <i>Sarocladium</i> sp. and <i>Fusarium</i> spp.....	51
2.1. Fungal Identification	51
2.1.1. Identification using species-specific primer	51
2.1.2. Identification using sequencing method	53
2.1.3. Identification using RFLP method	58
2.2. Cultural and morphological characterization	65
3. Genetic diversity of <i>Sarocladium oryzae</i> and <i>Fusarium</i> spp. using rep-PCR....	77
3.1 Genetic diversity of <i>Sarocladium oryzae</i>	77
3.2 Genetic diversity of <i>Fusarium</i> spp.	79
4. Bioecology studies of <i>Sarocladium oryzae</i> and <i>Fusarium</i> spp.....	85
4.1. Physiological Study of <i>Sarocladium oryzae</i> and <i>Fusarium</i> spp.	85
4.2. Detection of <i>Fusarium</i> spp. mycotoxin using gene encoding specific primers.....	115
5. Rice variety test against <i>Sarocladium oryzae</i> and <i>Fusarium</i> spp.....	119
V. CONCLUSIONS AND SUGGESTIONS	135
1. Conclusions	135
2. Suggestions.....	135
SUMMARY	136
RINGKASAN.....	139
